CONTENTS

NUMBER 1, JANUARY 1967

Distribution of the Human Rho(D) Antigen in the Red Cells of Non-Human Primates S. P. Masouredis, Mary Edith Dupuy and Margaret Elliot ........................................ 8

Studies on Human Peripheral Blood Lymphocytes in Vitro: III. Fine Structural Features of Lymphocyte Transformation by Pokeweed Mitogen. Steven D. Douglas, Peter F. Hoffman, Jan Borjeson and Lawrence N. Chessen ....................................................... 17

Immunologic Relationship between Blood Group Substances and a Fucose-Containing Glycolipid of Human Adenocarcinoma. Sen-Itiroh Hakomori, Jerzy Koscielak, Kurt J. Bloch and Roger W. Jeanloz ................................................................. 31

Demonstration of Tissue-Specific Soluble Antigens in Human Skin by Immunodiffusion. Toshiyuki Aoki and Tokuji Fujinami .............................................................. 39

The Pathogenesis of Theiler's GD VII Encephalomyelitis Virus Infection in Mice as Studied by Immunofluorescent Technique and Infectivity Titrations. Chien Liu, Julius Collins and Eleanor Sharp ............................................................................ 46

Hereditary Deficiency of the Second Component of Complement (C'2) in Man: Further Observations on a Second Kindred. Martin R. Klemperer, K. Frank Austen and Fred S. Rosen ...... 72

Reversal of Post-Thymectomy Wasting Disease in Mice by Multiple Thymus Grafts. Osias Stutman, Edmond J. Yunis, Carlos Martinez and Robert A. Good ........................................ 79

Quantitative Hemadsorption, a New Assay Technique. II. Assay of Neutralizing Antibodies to Hemadsorbing Viruses. N. B. Finter ........................................................................ 88

Bacteriophage Neutralizing Activity of Fragments Derived from Rabbit Immunoglobulin by Papain Digestion. G. W. Stemke and E. S. Lennox .................................................. 94

Agglutination of Particulate Antigens in Agar Gel. Felix Milgrom and Ulana Loza .................. 102

Runt Diseases Induced by Non-Living Bacterial Antigens. Richard D. Ekstedt and Lawrence L. Hayes ........................................................................................................ 110

Complement Associated Peptidase Activity of Guinea Pig Serum. I. Role of Complement Components. Neil R. Cooper and Elmer L. Becker ........................................... 119

Complement Associated Peptidase Activity of Guinea Pig Serum. II. Role of a Low Molecular Weight Enhancing Factor. Neil R. Cooper ...................................................... 132

Rabbit γA- and γM-Immunoglobulins with Allotypic Specificities Controlled by the a Locus. Edward A. Lichter ............................................................................... 139

Competition between, and Effectiveness of, IgG and IgM Antibodies in Indirect Fluorescent Antibody and Other Tests. Irur Cohen, Leslie C. Norins and Alfredo J. Julian ............... 143

Some Observations on the ABO Antigen Sites of the Erythrocyte Membranes of Adults and Newborn Infants. E. Haberman, Pat Blanton and James Martin ..................... 150

Streptococcal Related Glomerulonephritis. II. Glomerulonephritis in Rhesus Monkeys Immunologically Induced Both Actively and Passively with a Soluble Fraction from Human Glomeruli. A. S. Markowitz, Raymond Clasen, Bernard D. Nidus and Herman Ainsis ............. 161

Characterization of Human Serum and Nasal Hemagglutinating Antibody to Francisella tularensis. J. A. Bellanti, E. L. Buescher, W. E. Brandt, H. G. Dangerfield and D. Crosier ............................................................ 171

Studies on Immunologic Unresponsiveness during Secondary Disease. II. The Effect of Added Donor and Host Immunologically Competent Cells. John S. Thompson, Eric L. Simmons, Richard H. Moy and Margaret K. Crawford ................................................. 179

Autoradiographic Experiments Concerning the Importance of Mononuclear Cells in Experimental Hepatitis. H. Warnatz, F. Scheiffarth, F. Wolf and H. J. Schmidt ................................................. 402
Announcement. A Summer Course in Immunology .......................................................... 406

Suppression of the Primary and Secondary Immune Response of the Mouse by Phytohemagglutinin. Federico Spreafico and Edwin M. Lerner, II ........................................................................ 407
The Relationship between Maternal Rh0 Antibody Combining Properties and Severity of Erythroblastosis. Harold S. Goodman, L. Masaitis and G. Mizera ........................................................................ 425
Immunologic Unresponsiveness to Allergic Thyroiditis in Guinea Pigs. S. B. Salvin and H.-L. Liauw ........................................................................................................ 432
Termination of Acquired Tolerance by Administration of Small Lymphocytes. A. Michael Denman, Thomas L. Vischer and Peter Stastny ........................................................................ 442
Role of the Thymus in Tolerance. V. Suppressive Effect of Treatment with Nonaggregated and Aggregated Bovine γ-Globulin on Specific Immune Responses in Normal Adult Rats. Igai Gery and Byron H. Waksman ........................................................................ 446
The Alteration of Endotoxin by Postheparin Plasma and Its Purified Fractions. II. Relationship of the Endotoxin Detoxifying Activity of Eugulobulin from Postheparin Plasma to Lipoprotein Lipase. Duane R. Schultz and Elmer L. Becker ........................................................................ 482
Allergen-Binding Activity of γE, γG and γA Antibodies in Sera from Atopic Patients: In Vitro Measurements of Reaginic Antibody. Kimishige Ishizaka, Teruko Ishizaka and Margaret M. Hornbrook ........................................................................ 490
An Effect upon the Regulation of Gene Expression: Allotype Suppression at the α Locus in Heterozygous Offspring of Immunized Rabbits. Rose Mage, Gwendolyn O. Young and Sheldon Dray ........................................................................ 502
Antibody Responses in Experimental Infections with Listeria monocytogenes. A. S. Armstrong and C. P. Sword ........................................................................ 510
The Nature of C-Reactive Protein in Acute Phase Serum: Evidence for an Equilibrium Form Containing A Mucopolysaccharide of Serum. Y. Hokama, Monroe K. Coleman and Richard F. Riley ........................................................................ 521
The Immunologic Properties and Identity of Mucopolysaccharides Associated with C-Reactive Protein in Acute Phase Human Serum. Y. Hokama, Monroe K. Coleman and Richard F. Riley ........................................................................ 529
Synthesis of Human Immunoglobulins in Germinal Centers of Lymphoid Organs. Pierre Burtin and Denise Buffe ........................................................................ 536
Immunochemical Study of Influenza Virus and Associated Host Tissue Components. Calderon Howe, Lucille T. Lee, Arild Harboe and Gunnar Haukenes ........................................................................ 543
Heterogeneity and Sequence of Appearance of Rabbit Antibodies to Hog Intrinsic Factor. I. Michael Samloff and Eugene V. Barnett ........................................................................ 558
Antigenic Analysis of an N-Terminal Fragment of a Type K Bence Jones Protein. Margaret Tan and Wallace Epstein ........................................................................ 568
Anti-Pasteurella pestis Factor from Mice and Guinea Pigs. II. Some Chemical and Physical Characteristics. Daniel M. Eisler, Beverly Hill, Eleanor K. von Metz, Wei-Jen Chang and Robert J. Heckly ........................................................................ 576
Enhanced Immunologic Sensitization of Mice by the Simultaneous Injection of Antigen and Specific Antiserum. III. The Role of Antigen in Controlling the Immune Response Elicited with Immune Complexes. Geronimo Terres and Sherie Leaver Morrison ........................................................................ 584
Nonspecific Agglutination of Tanned Sheep Erythrocytes by Heat-Inactivated Mouse Serum Collected from Diluted Blood. J. Munoz ........................................................................ 593
Transplantation Immunity and Delayed Cutaneous Hypersensitivity Reactions in Dogs. J. Wayne Streilein and Clyde F. Barker ...................................................... 601
Nephrotoxic Serum Nephritis in Complement Intact and Deficient Mice. Emil R. Unanue, Michael R. Mardiney, Jr. and Frank J. Dixon ............................................. 609
Interaction of Rabbit Anti-Human H Chain Sera with Denatured Human γ-Globulin and Its Subunits. Shun-Ichi Hirose and Abraham G. Osler ........................................ 618
Interaction of Rheumatoid Factors with Urea-Denatured Human γ-Globulin and Its Subunits. Shun-Ichi Hirose and Abraham G. Osler ................................................... 628
Immediate Hypersensitivity Reactions Induced in Mice by Active and Passive Means. J. Munoz .. 638

NUMBER 4, APRIL 1967

In Vito Behavior of Homologous and Heterologous Thyroglobulin and Induction of Immunologic Unresponsiveness to Heterologous Thyroglobulin. Robert M. Nakamura and William O. Weigle .......................................................... 653
Complement-Fixing Antibodies in Sera of Sheep Affected with Visna and Mædi. Margaret Gudnadottir and Karolína Kristindsóttir ............................................. 663
Erratum ..................................................................................... 667
Specificity of the Primary and Secondary Antibody Responses to Myxoviruses. Reid Russell Heffner, Jr. and Ann Schluederberg ....................................................... 668
Heterotypic Serologic Responses after Yellow Fever Vaccination; Detection of Persons with Past St. Louis Encephalitis or Dengue. William L. Pond, N. Joel Ehrenkranz, Joseph X. Danausakas and Mary Jo Carter ........................................................... 673
The Growth of Rubella Virus in Small Laboratory Animals. J. S. Oxford ........................................................................ 697
Charcoal as a Carrier in a Rapid Slide Agglutination Test for the Detection of Antibodies to Adenoviruses. Morton Klein, Adamadia DeForest and Jay Satz ............................................................. 707
Electrophoretic Analysis of Polypeptide Chains Isolated from Antibodies in the Serum of Immunized Rabbits. Edward J. Miller, C. Kirk Osterland, Joseph M. Davie and Richard M. Krause ........................................................................ 710
Notice ........................................................................................ 715
A Mechanism of Bacterial Interference in Vitro. John C. Ribble ....................................................... 716
Neutralizing and Hemagglutination-Inhibiting Activity of Nasal Secretions following Experimental Human Infection with A2 Influenza Virus. Robert H. Alford, Roger D. Rossen, William T. Butler and Julius A. Kasel ........................................................................ 724
Formation and Isolation of Rabbit Antibodies to a Synthetic Antigen of Low Molecular Weight. Felix Borek, Yeheudit Stupp and Michael Sela ........................................................................ 739
Immunoglobulins of the Rhesus Monkey (Macaca mulatta). I. Antiserum to Bovine Serum Albumin and the Dinitrophenyl Antigenic Determinant. James D. Lakin, Roy Patterson and Jacob J. Pruzansky ........................................................................ 745
Quantitative Hemagglutination Studies on Several Anti-A Lectins. Aparna Chatteraj .................. 757
The Association of Increased Spontaneous Lymphocyte Transformation in Vitro with Clinical Manifestations of Drug Hypersensitivity. Fred A. Gill .......................... 778
Studies on Rabbit Lymphocytes in Vitro. VII. The Induction of Blast Transformation with the F(ab)\(^{2}\) and Fab Fragments of Sheep Antibody to Rabbit IgG. Stewart Sell ............. 786

The Use of the Preparative Ultracentrifuge to Detect Primary Interactions between I\(^{23}\)-Labeled Antigen and Antibody. Richard M. Rotheberg and Richard S. Farr .......................... 792

Antigenic Analysis of Human Cells and Tissues: Differential Susceptibility of Antigens to Physical or Chemical Treatment. Shih-Yen Chiu, Patricia J. Baker and K. Gerhard Brand ............... 806

Duck Immunoglobulins. I. Structural Studies on a 5.7S and 7.8S \(\gamma\)-Globulin. Howard M. Grey .......................................................... 811

Duck Immunoglobulins. II. Biologic and Immunochemical Studies. Howard M. Grey ..................... 820

The X-Y-Z Scheme of Immunocyte Maturation. II. The Effect of Antigen on Spontaneous Escape from Immune Paralysis. Stanley J. Dowden and Eli E. Sercarz .................. 827

The X-Y-Z Scheme of Immunocyte Maturation. III. Early IgM Memory and the Nature of the Memory Cell. Eli E. Sercarz and Vera S. Byers ......................................... 836

Uptake by Mononuclear Phagocytes of Protein-Coated Bentonite Particles Stabilized with a Carbodiimide. Robert R. Carpenter and Petronilo B. Barsales ...................... 844

An Alteration of Secreted Immunoglobulin in Serum. Eckeher Kolesch ................................................. 854

Changes in Subcellular and Circulating Antibody Levels during the Hemolysin Response in Rabbits. Susan E. Chapman and Dieter H. Sussdorf .............................. 860

Ontogeny of the Immune Response. III. Characterization of X-Component in Germfree, Colos-

trum-Deprived Piglets. Yoon Berm Kim, S. Gaylen Bradley and Dennis W. Watson ............. 868

Subgroups of L Type Bence-Jones Proteins. A. Ruffilli and C. Baglioni ............................................. 874

Number 5, May 1967

Dissociation of Immune Responses by the Induction of Partial Unresponsiveness. Relationship of PCA and Complement-Fixing Antibody Formation to the Suppression of Delayed Hypersensitivity. Yves Borel, Marthe Fauconnet and Peter Miescher .............. 881

Histocompatibility and Tumor Virus Antigens Identified on Cells Grown in Tissue Culture by Means of the Mixed Hemadsorption Reaction. Rolf F. Barth, J. Åke Espmark and Astrid Fagraeus .................................................. 888

Hypersensitivity to Ascaris Antigens. I. Skin-Sensitizing Activity of Serum Fractions from Guinea Pigs Sensitized to Crude Extracts. Gill Strejran and Dan H. Campbell .................. 893

Protein Conjugates of Polysaccharide from Cryptococcus neoformans. Mayer B. Goren and Gardner M. Middlebrook ................................................................. 901

Canine Immunoglobulins. II. Antibody Activities in Six Immunoglobulin Classes. John S. Johnson, John H. Vaughan and Scott N. Swisher ........................................ 935

A Serologic Study of Herpesvirus Hominis Strains by Mieroneutralization Tests. Frank P. Pauls and Walter R. Dowdle .......................................................... 941

Further Studies on Effect of Endotoxin on Antibody Response of Rabbit to Common Antigen of Entero bacteriaeae. H. Y. Whang and E. Neter ................................................... 948

Precipitation and Neutralization of Bacteriophage f2 by Rabbit Antibodies. David T. Row-

lands, Jr. .................................................................................. 958

Nephrotoxic Serum Nephritis in C6-Deficient Rabbits. I. Study of the Second Phase of the Disease. Klaus Rother, Ursula Rother, Pierre Vassalli and Robert T. McCluskey .................................................. 965

Antibody Content of Single Antibody-Forming Cells. Kengo Horiyata and Jonathan W. Uhr ................................................................. 972

The Presence of Antibody to Chikungunya and Other Serologically Related Viruses in the Sera of Sub-Human Primate Imports to the United States. V. R. Harrison, J. D. Marshall and N. B. Guillioud .................................................. 979

Immune Hemolysis: An Inter-Species Study. William D. Linescott ................................................... 991
Preparative Purification of Lung-Localizing Rabbit Anti-Rat Lung Antibodies in Vitro. Osamu Tsuzuku, Yasuo Yagi and David Pressman ............................................... 1004
Suppression of the Tuberculin Reaction by High Concentrations of Tuberculin and the Relationship of this Phenomenon to the Potency Assay of Tuberculin. Harold Baer and Robert W. Kolb ...................................................................................... 1015
The Immune Response to Human γG-Immunoglobulin in Rabbits Unresponsive to Fe Fragment and H Chain Protein. Hans L. Spiegelberg and William O. Weigle ............................................................ 1020
Changes in the Concentrations of the γc-Globulin and the γG-Globulin of Bovine Cerebrospinal Fluid with Maturation. Catherine F. C. MacPherson ..................................... 1039
Immunity to the 6C3HED Ascites Tumor following Treatment of Tumor-Bearing Mice with Escherichia coli L-Asparaginase. Morton D. Prager, Joseph Roberts and Nicholas Bachynsky ............................................................... 1045
Isolation of Rat Lung Antigens Capable of Neutralizing Localizing Activity of Anti-Lung Antibodies. Osamu Tsuzuku, Yasuo Yagi and David Pressman .......................................................... 1053
Antibody Responses of Rhesus (Macaca mulatta) Monkeys Experimentally Infected with Coxsackieviruses of Group B and Group A, Type 9. II. Heterotypic Antibody Responses to Echoviruses, Polioviruses and Reovirus Type 1. Nathalie J. Schmidt, Juanita Dennis and Edwin H. Lennette ............................................................... 1060
Immunoochemical Properties of Fe Fragment of Rabbit γG-Globulin. Kenneth Amrisian, Lillian Duchna and James Purcell .......................................................... 1067
Antibody and Gland Studies in Cortisone and ACTH-Injected Birds. Bruce Glick .......................................................... 1076
Response and Specificity of Anti-Shigella Rabbit Antibody. T. Tsuchiya, Y. Fukazawa, T. Shinoda and T. Okoshi .......................................................... 1085
The Behavior of Autologous Thyroglobulin in the Circulation of Rabbits Immunized with Either Heterologous or Altered Homologous Thyroglobulin. William O. Weigle and Gloria J. High. .......................................................... 1105
Repeated Infections with Respiratory Syncytial Virus. Marc Beem .......................................................... 1115
Antibodies against Staphylococcal Teichoic Acids and Type-Specific Antigens in Man. Harry Daugharty, R. Russell Martin and Arthur White .......................................................... 1123
Neutralization of Different Murine Interferons by Antibody. M. Boxaca and K. Paucker .......................................................... 1130
The Effect of Kaolin on Immunoglobulins: An Improved Technique to Remove the Nonspecific Serum Inhibitor of Reovirus Hemagglutination. John J. Mann, Roger D. Rossen, James R. Lehrich and Julius A. Kasel .......................................................... 1136
Skin Sensitizing Antibodies: A Comparative Study of Canine and Human PK and PCA Antibodies and a Canine Myeloma Protein. John H. Rockey and Robert M. Schwartzman .......................................................... 1143
Systemic Tuberculin Sensitivity in Mice. I. Factors Contributing to Active Tuberculin Shock. Shou-Hwa Han and Russell S. Weiser .......................................................... 1152
Systemic Tuberculin Sensitivity in Mice. II. Hypothermia as an Indicator of Tuberculin Shock in Actively and Passively Sensitized Mice. Shou-Hwa Han and Russell S. Weiser .......................................................... 1158
Systemic Tuberculin Sensitivity in Mice. III. The Effects of Adrenalectomy and Treatment with Antianaphylactic Agents. Shou-Hwa Han and Russell S. Weiser .......................................................... 1163
Characteristics of Direct and Indirect Complement-Fixing Antibodies Obtained from Turkeys Infected with Ornithosis Agent. Gordon R. Dreesman, Albert A. Benedict and R. W. Moore. .......................................................... 1167
Rabbit Antibodies Induced by Calf Thymus Histone-Serum Albumin Complexes. Ann. L. Sandberg, Maurice Liss and B. David Stollar .......................................................... 1182
Structural Characteristics of Hemolytic Antibodies as Determined by the Effects of Ionizing Radiation. Wendell F. Rosse, Herbert J. Rapp and Tibor Borsos......................... 1190

Factors Affecting the Degree of Nonspecific Staining Given by Fluorescin Isothiocyanate Labeled Globulins. G. Ann Herbert, Bertie Pittman and William B. Cherry..................... 1204

Studies on the Neutralization of Japanese Encephalitis Virus. I. Application of Kinetic Neutralization to the Measurement of the Neutralizing Potency of Antiserum. Yoshikatsu Ozaki and Kanafu Tabeyi.................................................. 1218

Studies of Rickettsia mooseri Cell Walls. II. Immunologic Properties. William H. Wood, Jr. and Charles L. Wiseman, Jr.................................................................. 1224

Experimental Streptococcal Glomerulonephritis in Rats. Lois H. Lindberg, Kenneth L. Vosti and Sidney Raffel................................................................. 1231

Antigenic and Immunogenic Studies on Purified Tetanus Toxoid. P. A. Nielsen, F. B. Ablondi, M. V. Querry, Cecilia Gussoni and M. S. Cooper........................................... 1248

Characterization of Hamster Antibody Reacting with Papovavirus SV40 Tumor Antigen. Satvir S. Tevethia.......................................................... 1257

Duration of Immunity to Tuberculosis in Mice Vaccinated Intravenously with Oil-Treated Cell Walls of Mycobacterium bovis Strain BCG. R. L. Anacker, W. R. Barclay, W. Brehmer, C. L. Larson and E. Ribi................................................................. 1265

The Effect of Antigen on the Rate of Guanosine-5'-C14 Incorporation by Lymphocytes. Lewis W. Mayron and Peter Baram................................................................. 1274

A Tissue Hemadsorption Inhibition Neutralization Test for Rubella Antibody. Ray Murphy, George J. Scheff and Richard A. Morrissey.................................................. 1286

Antigenic Analysis of a Metazoan Parasite, Toxocara canis. II. Purification and Analysis of Two Antigenic Components. Edward L. Jeska................................................ 1290

Infectivity Assay of Reoviruses: Comparison of Immunofluorescent Cell Count and Plaque Methods. Mary E. McClain, Rex S. Spendlove and Edwin H. Lennette................................................. 1301

Adoptive Immunity to Intracellular Infection. J. K. Frenkel............................................................................ 1309

The Incidence of HI Antibody to Influenza Virus A2/Singapore/1/57 in Individuals of Blood Groups A and O. C. W. Potter and G. C. Schild........................................ 1320
