CONTENTS

NUMBER 1, JANUARY 1967

Distribution of the Human Rho(D) Antigen in the Red Cells of Non-Human Primates S. P. Masouredis, Mary Edith Dupuy and Margaret Elliot ......................... 8

Studies on Human Peripheral Blood Lymphocytes in Vitro: III. Fine Structural Features of Lymphocyte Transformation by Pokeweed Mitogen. Steven D. Douglas, Peter F. Hoffman, Jan Borjeson and Lawrence N. Chessa .......................... 17

Immunologic Relationship between Blood Group Substances and a Fucose-Containing Glycolipid of Human Adenocarcinoma. Sen-Itiroh Hakomori, Jerzy Koscielak, Kurt J. Bloch and Roger W. Jeanloz ....................................................... 31

Demonstration of Tissue-Specific Soluble Antigens in Human Skin by Immunodiffusion. Toshiyuki Aoki and Tokuji Fujinami .................................................. 39

The Pathogenesis of Theiler's GD VII Encephalomyelitis Virus Infection in Mice as Studied by Immunofluorescent Technique and Infectivity Titrations. Chien Liu, Julius Collins and Eleanor Sharp ............................................. 46

The in Vitro Absorption of Anti-Brain Radioantibodies with Brain Sediments: Some Unusual Properties and a Quantitative Method. Eugene D. Day and Sylvester Lassiter ................................................... 56

Localization of Anti-Brain Radioantibodies in Rat Brain. Eugene D. Day, Lewis Rigsbee, Robert Wilkins and M. Stephen Mahaley, Jr. ............................... 62

Hereditary Deficiency of the Second Component of Complement (C'2) in Man: Further Observations on a Second Kindred. Martin R. Klemperer, K. Frank Austen and Fred S. Rosen ........................................... 72

Reversal of Post-Thymectomy Wasting Disease in Mice by Multiple Thymus Grafts. Osius Stutman, Edmond J. Yunis, Carlos Martinez and Robert A. Good .................................................. 79

Quantitative Hemadsorption, a New Assay Technique. II. Assay of Neutralizing Antibodies to Hemadsorbing Viruses. N. B. Finter ............................................. 88

Bacteriophage Neutralizing Activity of Fragments Derived from Rabbit Immunoglobulin by Papain Digestion. G. W. Stemke and E. S. Lennox ......................... 94

Agglutination of Particulate Antigens in Agar Gel. Felix Milgrom and Ulana Loza ................................................. 102

Runt Diseases Induced by Non-Living Bacterial Antigens. Richard D. Ekstedt and Lawrence L. Hayes ................................................................. 110

Complement Associated Peptidase Activity of Guinea Pig Serum. I. Role of Complement Components. Neil R. Cooper and Elmer L. Becker ........................................... 119

Complement Associated Peptidase Activity of Guinea Pig Serum. II. Role of a Low Molecular Weight Enhancing Factor. Neil R. Cooper ............................ 132

Rabbit γA- and γM-Immunoglobulins with Allotypic Specificities Controlled by the a Locus. Edward A. Lichter ......................................................... 139

Competition between, and Effectiveness of, IgG and IgM Antibodies in Indirect Fluorescent Antibody and Other Tests. Irvin C. Cohen, Leslie C. Norins and Alfredo J. Julian ............................... 143

Some Observations on the ABO Antigen Sites of the Erythrocyte Membranes of Adults and Newborn Infants. Sol Haberman, Pat Blanton and James Martin ............................................. 150

Streptococcal Related Glomerulonephritis. II. Glomerulonephritis in Rhesus Monkeys Immunologically Induced Both Actively and Passively with a Soluble Fraction from Human Glomeruli. A. S. Markowitz, Raymond Claessen, Bernard D. Nidus and Herman Ainios .............................................. 161

Characterization of Human Serum and Nasal Hemagglutinating Antibody to Francisella tularensis. J. A. Bellanti, E. L. Buescher, W. E. Brandt, H. G. Dangerfield and D. Crosier ............................................... 171

Studies on Immunologic Unresponsiveness during Secondary Disease. II. The Effect of Added Donor and Host Immunologically Competent Cells. John S. Thompson, Eric L. Simmons, Richard H. Moy and Margaret K. Crawford ............................................. 179

CONTENTS

Gross and Microscopic Skin Reactions to Killed Typhus Rickettsiae in Human Beings. Charles L. Wisseman, Jr., Yehia el Batawi, William H. Wood, Jr. and Antonio R. Noriega............ 194

Notices.......................................................... 210

Number 2, February 1967

Immunoechemical Studies on Delayed and Arthus-Type Hypersensitivity Reactions. I. The Relationship between Antigenic Determinant Size and Antibody Combining Site Size. Stuart F. Schlossman and Herbert Levine. .................................................. 211

Candida Precipitns. William H. Chew and Thomas L. Theus........................................ 220

Studies on the Radiosensitive Phase of the Primary Antibody Response in Rabbits. I. The Role of the Macrophage. James F. Prlbnow and Myron S. Silverman. ...................... 225

Synthetic Polypeptide Metabolism. III. Degradation and Organ Localization of Isomeric Synthetic Polypeptide Antigens. Charles B. Carpenter, Thomas J. Gill, III and L. T. Mann, Jr........... 236

An Antigen Common to Mouse Cells and Salmonella typhimurium. William Boyle. .... 256

Studies on the Specificity of the Cellular Infiltrate of Delayed Hypersensitivity Reactions. Stanley Cohen, Robert F. McCluskey and Baruj Benacerraf................................................. 269

Application of the Paired Label Radioantibody Technique to Tissue Sections and Cell Smears. Nobuyuki Tanigaki, Yasuo Yagi and David Pressman. ......................................................... 274

Antibodies against Human Leukemia Cell Lines. Nobuyuki Tanigaki, Yasuo Yagi, George E. Moore and David Pressman.......................................................... 281

Interaction of Penicillin and Erythrocytes. Alan S. Josephson and Allan P. Kaplan. .... 293

Papain Fragmentation of the Subunits of Human Macroglobulin. Kaoru Onoue, Tadamitsu Kishimoto and Yuichi Yamamura......................................................... 303

Differentiation of Arboviruses by Immunoelectrophoresis. Raúl R. Caudrado and Jordi Casals........................................ 314

Estradiol-Induced Wasting Syndrome in Neonatal Mice. Richard W. Reilly, John S. Thompson, Robert K. Bielski and Charles D. Severson.................................................. 321

Detection of Immune Response against Synthetic Polymers of Amino Acids Employing the Plaque-Forming Cell System. I. Reaction with Sheep Erythrocytes Coated with Polymer. Patricia Walsh, Paul Maurer and Marianne Egan........................................ 344

Effect of Anticoagulants on Delayed Hypersensitivity Reactions. Stanley Cohen, Baruj Benacerraf, Robert F. McCluskey and Zoltan Ovary....................................................... 351

Thermostable Brain-Specific Autoantigen. Felix Milgrom, Z. Maide Tuggae, Walter Campbell and Erneet Witebsky.......................................................... 359

Antibody Response of Rhesus Monkeys to a Density Gradient Purified Murine Leukemia Virus (Rauscher). Louis R. Sibel, Mary Alexander Fink, Carol L. McCune and Carolyn A. Cowles. 368

Physicochemical and Immunologic Properties of Eluates Containing I-125 Anti-Rha(D). Susie W. Fong and S. P. Masouredis......................................................... 374

Similarities between Rabbit Antibodies Produced following Ingestion of Bovine Serum Albumin and following Parenteral Immunization. Richard M. Rothenberg, Sumner C. Kraft and Richard S. Farr........................................... 386

Studies Concerning the Importance of Mononuclear Cells in the Development of Experimental Hepatitis. F. Scheiffarth, H. Warnatz and K. Mayer........................................ 396
