CONTENTS

Gross and Microscopic Skin Reactions to Killed Typhus Rickettsiae in Human Beings. Charles L. Wisseman, Jr., Yehia el Batawi, William H. Wood, Jr. and Antonio R. Noriega...... 194

Notices.......................................................... 210

NUMBER 2, FEBRUARY 1967

Immunochemical Studies on Delayed and Arthus-Type Hypersensitivity Reactions. I. The Relationship between Antigenic Determinant Size and Antibody Combining Site Size. Stuart F. Schlossman and Herbert Levine..................................................... 211

Candida Precipitins. William H. Chew and Thomas L. Theus.................................................. 220

Studies on the Radiosensitive Phase of the Primary Antibody Response in Rabbits. I. The Role of the Macrophage. James F. Pribnow and Myron S. Silverman .............................................................. 225

Suppression by Antihistamine of Passive Cutaneous Anaphylaxis Produced with Anaphylactic Antibody in the Guinea Pig. Henry Z. Movat, Nancy L. Di Lorenzo, Norton S. Taichman, Sam Berger and Howard Stein .................................................. 230

Synthetic Polypeptide Metabolism. III. Degradation and Organ Localization of Isomeric Synthetic Polypeptide Antigens. Charles B. Carpenter, Thomas J. Gill, III and L. T. Mann, Jr........... 236

An Antigen Common to Mouse Cells and Salmonella typhimurium. William Boyle.......................... 256

Studies on the Specificity of the Cellular Infiltrate of Delayed Hypersensitivity Reactions. Stanley Cohen, Robert F. McCluskey and Baruj Benacerraf..................................................................................... 269

Application of the Paired Label Radiantibody Technique to Tissue Sections and Cell Smears. Nobuyuki Tanigaki, Yasuo Yagi and David Pressman .............................................................. 274

Antibodies against Human Leukemia Cell Lines. Nobuyuki Tanigaki, Yasuo Yagi, George E. Moore and David Pressman .............................................................. 281

Interaction of Penicillin and Erythrocytes. Alan S. Josephson and Allan P. Kaplan ......................... 283

Papain Fragmentation of the Subunits of Human Macroglobulin. Kaoru Onoue, Tadamitsu Kishimoto and Yuichi Yamamura ...................................................................................... 293

Differentiation of Arboviruses by Immunolectrophoresis. Raoul R. Caudrado and Jordi Casals...... 314

Estradiol-Induced Wasting Syndrome in Neonatal Mice. Richard W. Reilly, John S. Thompson, Robert K. Bielski and Charles D. Severson ...................................................................................... 321

The Effect of Estrogenic Hormones on Immune Responses in Normal and Irradiated Mice. John S. Thompson, Margaret K. Crawford, Richard W. Reilly and Charles D. Severson ...................... 331

Detection of Immune Response against Synthetic Polymers of Amino Acids Employing the Plaque-Forming Cell System. I. Reaction with Sheep Erythrocytes Coated with Polymer. Patricia Walsh, Paul Maurer and Marianne Egan ........................................................................ 344

Effect of Anticoagulants on Delayed Hypersensitivity Reactions. Stanley Cohen, Baruj Benacerraf, Robert F. McCluskey and Zoltan Ovary .............................................................. 351

Thermostable Brain-Specific Autoantigen. Felix Milgrom, Z. Maide Tuggae, Walter Campbell and Erneet Witebsky ...................................................................................... 359

Antibody Response of Rhesus Monkeys to a Density Gradient Purified Murine Leukemia Virus (Rauscher). Louis R. Sibel, Mary Alexander Fink, Carol L. McCune and Carolyn A. Cowles 368

Physicochemical and Immunologic Properties of Eluates Containing I-125 Anti-Rha(D). Susie W. Fong and S. P. Masouredis ...................................................................................... 374

Similarities between Rabbit Antibodies Produced following Ingestion of Bovine Serum Albumin and following Parenteral Immunization. Richard M. Rothenberg, Summer C. Kraft and Richard S. Farr ...................................................................................... 386

Studies Concerning the Importance of Mononuclear Cells in the Development of Experimental Hepatitis. F. Scheiffarth, H. Warnatz and K. Mayer ...................................................................................... 396
Autoradiographic Experiments Concerning the Importance of Mononuclear Cells in Experimental Hepatitis. H. Warnatz, F. Scheiffarth, F. Wolf and H. J. Schmidt .................................................. 402
Announcement. A Summer Course in Immunology ............................................. 406

NUMBER 3, MARCH 1967

Suppression of the Primary and Secondary Immune Response of the Mouse by Phytohemagglutinin. Federico Spreafico and Edwin M. Lerner, II ........................................... 407
The Relationship between Maternal Rh0 Antibody Combining Properties and Severity of Erythroblastosis. Harold S. Goodman, L. Masaitis and G. Mizera ................................. 425
Immunologic Unresponsiveness to Allergic Thyroiditis in Guinea Pigs. S. B. Salvin and H.-L. Liauw .................................................................................... 432
Termination of Acquired Tolerance by Administration of Small Lymphocytes. A. Michael Denman, Thomas L. Vischer and Peter Stastny ............................................ 442
Role of the Thymus in Tolerance. V. Suppressive Effect of Treatment with Nonaggregated and Aggregated Bovine γ-Globulin on Specific Immune Responses in Normal Adult Rats. Igal Gery and Byron H. Waksman ............................................................. 446
The Alteration of Endotoxin by Postheparin Plasma and Its Purified Fractions. II. Relationship of the Endotoxin Detoxifying Activity of Euglobulin from Postheparin Plasma to Lipoprotein Lipase. Duane R. Schultz and Elmer L. Becker .............................................................. 482
Allergen-Binding Activity of γE, γG and γA Antibodies in Sera from Atopic Patients: In Vitro Measurements of Reaginic Antibody. Kimishige Ishizaka, Teruko Ishizaka and Margaret M. Hornbrook ............................................................. 490
An Effect upon the Regulation of Gene Expression: Allotype Suppression at the a Locus in Heterozygous Offspring of Immunized Rabbits. Rose Mage, Gwendolyn O. Young and Sheldon Dray ..................................................................................... 502
Antibody Responses in Experimental Infections with Listeria monocytogenes. A. S. Armstrong and C. P. Sword .......................................................................... 510
The Nature of C-Reactive Protein in Acute Phase Serum: Evidence for an Equilibrium Form Containing A Mucopolysaccharide of Serum. Y. Hokama, Monroe K. Coleman and Richard F. Riley .............................................................. 521
The Immunologic Properties and Identity of Mucopolysaccharides Associated with C-Reactive Protein in Acute Phase Human Serum. Y. Hokama, Monroe K. Coleman and Richard F. Riley .............................................................. 529
Synthesis of Human Immunoglobulins in Germinal Centers of Lymphoid Organs. Pierre Burtin and Denise Buffe .......................................................................... 536
Immunochemical Study of Influenza Virus and Associated Host Tissue Components. Calderon Howe, Lucille T. Lee, Arild Harboe and Gunnar Haukenes .............................................................. 543
Heterogeneity and Sequence of Appearance of Rabbit Antibodies to Hog Intrinsic Factor. I. Michael Samloff and Eugene V. Barnett .............................................................. 558
Antigenic Analysis of an N-Terminal Fragment of a Type K Bence Jones Protein. Margaret Tan and Wallace Epstein .............................................................. 568
Anti-Pasteurella pestis Factor from Mice and Guinea Pigs. II. Some Chemical and Physical Characteristics. Daniel M. Eisler, Beverly Hill, Eleanor K. von Metz, Wei-Jen Chang and Robert J. Heckly ..................................................................................... 576
Enhanced Immunologic Sensitization of Mice by the Simultaneous Injection of Antigen and Specific Antiserum. III. The Role of Antigen in Controlling the Immune Response Elicited with Immune Complexes. Geronimo Terres and Sherie Leaver Morrison .............................................................. 584
Nonspecific Agglutination of Tanned Sheep Erythrocytes by Heat-Inactivated Mouse Serum Collected from Diluted Blood. J. Munoz ..................................................................................... 593
Transplantation Immunity and Delayed Cutaneous Hypersensitivity Reactions in Dogs. J. Wayne Streilein and Clyde F. Barker ...................................................... 601
Nephrotoxic Serum Nephritis in Complement Intact and Deficient Mice. Emil R. Unanue, Michael R. Mardiney, Jr. and Frank J. Dixon ............................................. 609
Interaction of Rabbit Anti-Human H Chain Sera with Denatured Human γ-Globulin and Its Subunits. Shun-Ichi Hirose and Abraham G. Osler ........................................ 618
Interaction of Rheumatoid Factors with Urea-Denatured Human γ-Globulin and Its Subunits. Shun-Ichi Hirose and Abraham G. Osler ................................................... 628
Immediate Hypersensitivity Reactions Induced in Mice by Active and Passive Means. J. Munoz .......................................................... 638

NUMBER 4, APRIL 1967

In Vivo Behavior of Homologous and Heterologous Thyroglobulin and Induction of Immunologic Unresponsiveness to Heterologous Thyroglobulin. Robert M. Nakamura and William O. Weigle .......................................................... 653
Complement-Fixing Antibodies in Sera of Sheep Affected with Visna and Mædi. Margaret Gudnadottir and Karolins Kristinsdottir ....................................................... 663
Erratum ..................................................................................... 667
Specificity of the Primary and Secondary Antibody Responses to Myxoviruses. Reid Russell Heffner, Jr. and Ann Schluederberg ...................................................... 668
Heterotypic Serologic Responses after Yellow Fever Vaccination; Detection of Persons with Past St. Louis Encephalitis or Dengue. William L. Pond, N. Joel Ehrenkranz, Joseph X. Danauskas and Mary Jo Carter ........................................................... 673
The Growth of Rubella Virus in Small Laboratory Animals. J. S. Oxford .......................................................... 697
Charcoal as a Carrier in a Rapid Slide Agglutination Test for the Detection of Antibodies to Adenoviruses. Morton Klein, Adamadis DeForest and Jay Satz .......................................................... 707
Electrophoretic Analysis of Polypeptide Chains Isolated from Antibodies in the Serum of Immunized Rabbits. Edward J. Miller, C. Kirk Osterland, Joseph M. Davie and Richard M. Krause .......... 710
Notice ........................................................................................ 715
A Mechanism of Bacterial Interference in Vitro. John C. Ribble .......................................................... 716
Neutralizing and Hemagglutination-Inhibiting Activity of Nasal Secretions following Experimental Human Infection with A2 Influenza Virus. Robert H. Alford, Roger D. Rossen, William T. Butler and Julius A. Kasel .......................................................... 724
Formation and Isolation of Rabbit Antibodies to a Synthetic Antigen of Low Molecular Weight. Felix Borek, Yehudit Stupp and Michael Sela .......................................................... 739
Immunoglobulins of the Rhesus Monkey (Macaca mulatta). I. Antiserum to Bovine Serum Albumin and the Dinitrophenyl Antigenic Determinant. James D. Lakin, Roy Patterson and Jacob J. Pruzansky .......................................................... 745
Quantitative Hemagglutination Studies on Several Anti-A Lectins. Aparna Chattoraj .......................................................... 757
The Association of Increased Spontaneous Lymphocyte Transformation in Vitro with Clinical Manifestations of Drug Hypersensitivity. Fred A. Gill .......................................................... 778
