Proceedings of the Tenth Congress of the European Society of Haematology

Part I
Main Lectures

Subscribers to "Acta Haematologica" have received this part of the Congress Proceedings as Vol. 36, No. 1-2 and No. 3-4, 1966, of the journal. 1 volume, IV + 312 p., 87 fig., 19 tab., 1966, cloth bound. S.Frs./DM 75.~/US $18.00/137s. 6d.

Part II
Short Papers

Two volumes (Part II/1 and Part II/2), with index, authors' index, subject index, XXXVI + 1588 p., 514 fig., 314 tab., 1967, cloth bound. S.Frs./DM 370.~/US $88.80/£33-18-0.

**HETROL SLIDE TEST**

Hetrol Slide Test screens and confirms in one simple operation, differentiating Infectious Mononucleosis from other heterophile antibodies.

A presumptive test and a confirming test performed on the same slide at the same time detect the presence of Infectious Mononucleosis antibodies.

Hetrol test cells are stabilized suspensions ready-for-use.

Hetrol Slide Test eliminates preparation of fresh erythrocytes, and is comparable in specificity with differential tube tests.

Infectious Mononucleosis positive and negative controls are included to insure reliable results.

Hetrol Reagents are stable when stored at 2-10°C.

Literature available on request.

**DETECTION OF INFECTIOUS MONONUCLEOSIS ANTIBODIES**

Hetrol Slide Test screens and confirms in one simple operation, differentiating Infectious Mononucleosis from other heterophile antibodies.

A presumptive test and a confirming test performed on the same slide at the same time detect the presence of Infectious Mononucleosis antibodies.

Hetrol test cells are stabilized suspensions ready-for-use.

Hetrol Slide Test eliminates preparation of fresh erythrocytes, and is comparable in specificity with differential tube tests.

Infectious Mononucleosis positive and negative controls are included to insure reliable results.

Hetrol Reagents are stable when stored at 2-10°C.

Literature available on request.
