CONTENTS
NUMBER 1, JULY 1968

IMMUNOCHEMISTRY

Immunologic Studies of a Partially Purified Sheep Erythropoietin. Ernest Rioux and Allan J. Erslev ................................................................. 6
Properties of Erythrocytes Stabilized with Sulfosalicylic Acid and Their Use in an Indirect Hemagglutination Test with Influenza Virus RNP-Antigen. H. Becht ........................................... 18
Induction of Erythema-Wheal Reactions by Soluble Antigen-γ-E Antibody Complexes in Humans. Kimishige Ishizaka and Teruko Ishizaka .................................................. 68
Heterogeneity in Antibodies Specific for Aggregated Human γ-Globulin. Christopher S. Henney and Kimishige Ishizaka ............................................................... 79

CELLULAR IMMUNOLOGY

The Use of Catfish, Ictalurus nebulosus (Le Sueur), as Experimental Animals for Immunization with Human Secretor Saliva and Other Antigenic Materials. Joseph V. Chuba, William J. Kuhns and Ross F. Nigrelli ........................................... 1
The Factors Affecting the Strength of “One-Way” Stimulation with Irradiated Leukocytes in Mixed Leukocyte Cultures. Shinpei Kasakura and Louis Lowenstein ......................... 12
Further Studies on the Effect of Specific Antiserum on Induction, Maintenance and Termination of Immuneologic Tolerance. Herman Friedman ...................................................... 23
Immunologic Unresponsiveness, Immunity and Enhancement in Experimental Allergic Encephalomyelitis. S. B. Salvino and H. L. Liao .................................................. 33
A Correlate of Human Delayed Hypersensitivity: Specific Inhibition of Capillary Tube Migration of Sensitized Human Lymph Node Cells by Tuberculin and Histoplasmin. Daniel E. Thor and Sheldon Dray .................................................. 51
Phagocytosis and Intracellular Fate of Mycobacterium tuberculosis: In Vitro Studies with Guinea Pig Peritoneal and Alveolar Mononuclear Phagocytes. Kameron W. Maxwell and Stanley Marcus .................................................. 176

IMMUNOPATHOLOGY

Antimuscle Factor and Antinuclear Factor in Patients with Myasthenia Gravis. I. Heavy Chain Determinants. D. E. McFarlin, J. S. Johnson and W. F. K. Seymour ........................................ 104
The Reactivity of Long-Lived Lymphocytes to Typhoid Vaccine in Situ in Rat Popliteal Lymph Nodes. John J. Miller, III and Leonard J. Cole .................................................. 133
Experimental Allergic Uveitis. I. Production in the Guinea Pig and Rabbit by Immunization with Retina in Adjuvant. W. B. Wacker and M. M. Lipton ........................................ 151
Experimental Allergic Uveitis. II. Serologic and Hypersensitive Responses of the Guinea Pig following Immunization with Homologous Retina. W. B. Wacker and M. M. Lipton ................ 157

MICROBIAL AND VIRAL IMMUNOLOGY

Latency in Human Infections with TRIC Agents. Lavelle Hanna, Chandler R. Dawson, Odeon Briones, Phillips Thygeson and Ernest Jawetz .................................................. 43
Antibody Response in Humans to Deoxycholate-Treated Influenza Virus Vaccine. A. E. Duxbury, A. W. Hampson and J. G. M. Sievers .................................................. 62
Difference in the Immunoglobulin Class of Poliobantibody in the Serum of Men and Women. Eugene A. Nibender, Ruth Berger Weissinger, Magda Hevizy and Horace L. Hodes ............................... 92
Induction of Tuberculin Hypersensitivity and Serologic Unresponsiveness to Tubercle Bacilli in Newborn and Young Guinea Pigs. Bernard W. Janieski and Stephen A. Aron ........................................ 121
Human Serum Interactions with Candida albicans. Richard A. Children, Richard Hong and Paul G. Quie .......................................................... 128

</table>
CONTENTS

MICROBIAL AND VIRAL IMMUNOLOGY

Neutralization of Poliovirus by IgA Coproantibodies. Robert Keller and Julia E. Dwyer ......... 192
Immunodiffusion Reactions with Rubella Antigens. Nathalie J. Schmidt and Bohumil Styk ........ 210
Heterogeneity in the Ability of Rabbit 7 S and 19 S Neutralizing Antibodies to Differentiate bet-

between Intratypic Antigenic Variants of Herpes Simplex Virus. Berge Hampar, Michael G. Mage and Mary Alice Keen ............. 256
Potentiation of Serum Bactericidal Activity by Lysozyme. Starkey D. Davis, Diethard Gomes, Antoinette Iannetta and Ralph J. Wedgwood ...................................................... 277
The Role of Serum Lipase in the Degradation of Salmonella enteritidis Endotoxin. Jiban D. Gupta and Charles E. Reed ................................................ 308

COMMUNICATIONS

Immunologically Induced Aspermatogenesis in the White House. Betty Jean Hargis, Saul Malkiel and Jane Berkelhammer ................................................................... 374
The Production of Antisera to Human γG Subclasses in Rabbits Using Immunologic Unresponsive-

ness. H. L. Spiegelberg and W. O. Weigle ................................................. 377

NUMBER 3, SEPTEMBER 1968

IMMUNOCHEMISTRY

Purification of Two Fragments of M Protein From a Strain of Group A, Type 12 Streptococcus. Rudolph H. Johnson and Kenneth L. Vosti ................................................ 381
The C'1a Fixation and Transfer Test: Examples of its Applicability to the Detection and Enumera-

tion of Antigens and Antibodies of Cell Surfaces. Tibor Boross, Harvey R. Colten, Joel S. Spalter, Nicholas Rogentine and Herbert J. Rapp .................................................. 392
An Antigen-Binding Capacity Test for Human Immunoglobulin G (IgG) Fragments. Jean-

Charles Cerotti ................................................ 433
Antigenicity of Guanidinated and Amidinated Bovine Serum Albumin. A. F. S. A. Habeeb .... 505
Is Delayed Sensitivity a Preparation for Antibody Synthesis? Sidney Leskowitz ................ 528
The Immunologic Response of Rabbits to Carrageenans, Sulfated Galactans Extracted from Marine Algae. K. H. Johnston and E. L. McCandless ............. 556

CELLULAR IMMUNOLOGY

Synthesis of Specific RNA Molecules during Immune Response in the Mouse Spleen. R. B. Church, U. Storb, B. J. McCarthy and R. S. Weiser .................................................. 399
Studies of Human C-Reactive Protein in an In Vitro Phagocytic System. Ralph C. Williams, Jr. and Paul G. Quie .................................................. 426
Studies on the Ontogeny of the Mouse Immune System. II. Immunoglobulin-Producing Cells. Marvin L. Tyan and Leonard A. Herzenberg .................................................. 446
Studies on Human Peripheral Blood Lymphocytes In Vitro. V. Biosynthesis of Immunoglobulins. L. N. Chessin, P. R. Glade, R. Asofsky, P. D. Baker, R. Reisfeld and W. Terry .................................................. 458
The Cell-Migration-Inhibition Inconrate of Delayed Hypersensitivity. Conversion of Human Non-
sensitive Lymph Node Cells to Sensitive Cells with an RNA Extract. Daniel E. Thor and Sheldon Dray .................................................. 469
Significance of the Mast Cell Response to a Lysosomal Protein. Junius M. Clark and R. D. Higginbotham .................................................. 488
Relationship of Germinal Centers in Lymphoid Tissue to Immunologic Memory. III. Proliferative Response of Primed Cells from Splenic White and Red Pulp following Reexposure to Antigen in Vitro. E. B. Jacobson and G. J. Thorbecke .................................................. 515
Detection of γA Antibody-Releasing Cells to Erythrocyte and Lipopolysaccharide Antigens. Carla S. Walters and Anne L. Jackson .................................................. 541
CONTENTS

Staphylococcal Delayed Hypersensitivity in Mice. II. In Vitro Demonstration and Specificity of Delayed Hypersensitivity. James H. Taubler and Stuart Mudd ............................ 550
The Role of Proliferation in Delayed Hypersensitivity. Joseph D. Feldman ............................................ 563
Immunologic Tolerance Induced in the Adult Rabbit with Modified BSA. P. C. Frei, S. Cruchaud, L. Arnaudo and A. Vannotti .............................................................. 605

IMMUNOPATHOLOGY

Transplantation Antibody Associated with First-Set Renal Homografts. Frederick W. Spong, Joseph D. Feldman and Sun Lee ...................................................... 418
Rabbit Blocking and Binding Antibodies to Human Intrinsic Factor and Intrinsic Factor-B2 Complex. I. Michael Samloff and Michael D. Turner ............................................ 578
Antibody Production Stimulated in Vitro in Burkitt Lymphoma Cells. Hideo Kamei and George E. Moore ................................................................................. 587

MICROBIAL AND VIRAL IMMUNOLOGY

An Immuno-Cytopathogenic Interaction between Sensitized Leukocytes and Epithelial Cells Carrying a Persistent Noncytocidal Myxovirus Infection. Lawrence F. Speel, June E. Osborn and Duand L. Walker ............................................ 409
Antigenic Variants of Arboviruses. IV. The Distinctive Antigenic Properties of Virus Clones Propagated in Different Hosts. J. R. Henderson ............................................ 451
Experimental Pleural Effusion as a Manifestation of Delayed Hypersensitivity to Tuberculin PPD. James C. Allen and Michael A. Apicella ................................................ 481
Neutralisation and Sensitization of Herpes Simplex Virus with Antibody Fragments from Rabbits of Different Allotypes. Warren K. Ashe, Michael Mage, Rose Mage and Abner Louis Notkins ............................................ 500
Formation and Transfer of Antibodies in Congenital Murine Infections with A Type 2 Reovirus. Mary M. Carruthers and A. Martin Lerner ................................................ 523
Observations Concerning the Pathogenesis of E. Coli Infections in Mice. Donald N. Medearis, Jr. and Jean F. Kenny ............................................ 534
Neutralizing Activity in Nasal Secretions and Serum in Resistance of Volunteers to Parainfluenza Virus Type 2. Lawrence P. Tremonti, Juuy-Shin L. Lin and George Gee Jackson ............................................ 572
Immunosuppression by Leukemia Viruses. I. Effect of Friend Disease Virus on Cellular and Humoral Hemolysin Responses of Mice to a Primary Immunization with Sheep Erythrocytes. Walter S. Ceglowski and Herman Friedman ............................................ 594
Application of Passive Hemagglutination Methods for Detection of Antibody to Viral Antigen in Hamsters Bearing Adenovirus Type 12 Tumors. Stanley S. Lefkowitz ............................................ 611

COMMUNICATION

The Association of the C7 Allotype of Rabbits with Some Light Polypeptide Chains Which Lack b Locus Allotype. Rose G. Mage, Glendowlyn O. Young and Ralph A. Reisfeld ............................................ 617

NUMBER 4, OCTOBER 1968

IMMUNOCHEMISTRY

Hypersensitivity to Ascaris Antigens. IV. Production of Homocytotropic Antibodies in the Rat. Gill Strejan and Dan H. Campbell ............................................ 628
Studies of Blood Group Substances. IV. Caprine IgG and IgM Antibodies to Human H Substance. Donald M. Marcus and Louise E. Cass ............................................ 669
Catabolism of Human γG Immunoglobulins of Different Heavy Chain Subclasses. II. Catabolism of γG Myeloma Proteins in Heretologous Species. Hans L. Spiegelberg and Howard M. Grey ............................................ 711
Iso-Antibodies to a β Globulin that Detects Spontaneous Delayed Iso-Hypersensitivity in Guinea Pigs. D. A. Follett and J. R. Battisto ............................................ 753
IMMUNOGENETICS

Types of Canine Serum Immunoglobulins. Roy Patterson, Mary Roberts and Jacob J. Pruzansky ........................................................................... 687

Studies on Synthetic Polypeptide Antigens. XX. Genetic Control of the Antibody Response in the Rat to Structurally Different Synthetic Polypeptide Antigens. S. J. Simonian, T. J. Gill, III and S. N. Gershoff ........................................................................... 730

CELLULAR IMMUNOLOGY

Ferritin-Antibody Localization of Erythrocyte Antigenic Sites in Immunohemolytic Anemias. William C. Davis, Steven D. Douglas, Lawrence D. Pets and H. Hugh Fudenberg ........................................................................... 621

The Application of the Irradiated Hamster Test to the Study of Experimental Allergic Encephalomyelitis. Joan Kornblum ........................................................................... 702

Spontaneous Delayed Iso-Hypersensitivity in Guinea Pigs. Jack R. Baggio ........................................................................... 743

The Specificity of Antigen-Induced Thymidine-2-14C Incorporation into Lymph Node Cells from Sensitized Animals. Michael Stulbarg and Stuart F. Schlossman ........................................................................... 784

Non-specific Stimulation of Antibody Production in Surgically Bursectomized Chickens by Bursa-Containing Diffusion Chambers. Peter B. Dent, Daniel Y. E. Perey, Max D. Cooper and Robert A. Good ........................................................................... 799

IMMUNOPATHOLOGY

Delayed Hypersensitivity to Myelin Basic Protein in the Passive Transfer of Experimental Allergic Encephalomyelitis. George A. Falk, Marian W. Kies and Ellsworth C. Alvord, Jr ........................................................................... 638

Biologic Properties of Rat Antibodies. I. Antigen-Binding by Four Classes of Anti-DNP Antibodies. Kurt J. Bloch, Herbert C. Morse, III and K. Frank Austen ........................................................................... 650

Biologic Properties of Rat Antibodies. II. Time-Course of Appearance of Antibodies Involved in Antigen-Induced Release of Slow Reactions Substance of Asphyxiation (SRS-A™); Association of This Activity with Rat IgG. Herbert C. Morse, III, Kurt J. Bloch and K. Frank Austen ........................................................................... 658

Calcium Requirements for Complement Dependent Hemolytic Reactions. Richard E. Bryant and David E. Jenkins, Jr ........................................................................... 694

Anti-Nuclear Antibodies in Mice. I. Influence of Age and Possible Genetic Factors on Spontaneous and Induced Responses. Perry O. Teague, George J. Friou and Lynn L. Myers ........................................................................... 717

MICROBIAL AND VIRAL IMMUNOLOGY

Evidence of SV40-Specific Transplantation and Surface Antigens in Cells Transformed by Para-Adenovirus 12. Robert N. Lausch, Satvir S. Tevethia and Fred Rapp ........................................................................... 645

Toxicity of Combined Histamine and Serotonin in Normal, Pertussis-Sensitized, and β Adrenergically Blocked Mice. Charles W. Fishel, Kenneth F. Keller and Brenda S. O'Bryan ........................................................................... 679

The Immunodepressive Action of Lymphocytic Choriomeningitis Virus in Mice. C. A. Mims and Sally Wainwright ........................................................................... 717

Immunoglobulins Produced in Response to Japanese Encephalitis Virus Infections of Man. Keizo Ishii, Yasuko Matsunaga and Reisaku Kono ........................................................................... 770

Suckling Mouse Cataract Agent (SMCA) in Mice. I. Factors Affecting the Incidence of Cataracts and Growth of Virus in Several Strains of Mice. H. Fred Clark and David T. Karzon ........................................................................... 776

Suckling Mouse Cataract Agent (SMCA) in Mice. II. Transfer of Protection to Progeny of SMCA-Infected Dams. H. Fred Clark and David T. Karzon ........................................................................... 782

The Biologic Role of Host Antigens in Newcastle Disease Virus. V. M. Zhdanov and G.-K. S. Che pulpis ........................................................................... 788

COMMUNICATIONS

Adenovirus Type 12 Oncogenicity in Newborn Hamsters: The Effect of Pokeweed Mitogen. Ashley T. Hasse, J. A. Kasel and L. N. Chessin ........................................................................... 806

Modification of Meningococcal Polysaccharide Antigens for Use in Passive Hemagglutination Tests. Bruce W. Hammond, David T. Kingsbury and Emilio Weiss ........................................................................... 808

SPECIAL ARTICLE

Abstracts of Papers Presented at the Third International Complement Workshop, Harvard Medical School, Boston, Massachusetts, June 3-5, 1968. ........................................................................... 810
CONTENTS

NUMBER 5, NOVEMBER 1968

IMMUNOCHEMISTRY

A Structural Study of Human Exocrine IgA Globulin. Richard W. Newcomb, David Normansell and Dennis R. Stanworth. 905

Antibody Activity Associated with the Fluorescent Polypeptide Chains of Human Immunoglobulin G. Charles H. Evans, Sharon B. Herron and Gerald Goldstein. 915

Production and Properties of Mouse Antihapten Antibodies. Carlos A. Mattioli, Yasuo Yagi and David Pressman. 939

The Heterogeneity of Combining Sites of Anti-Benzylpenicilloyl Antibodies Obtained from Individual Rabbits: Changes in Combining Sites of γG and γM Antibodies during the Immune Response. Tsuyoshi Atsumi, Masaaki Adachi, Yoshio Kinosita, Morio Kawasaki and Yoshihiko Horiiuchi. 1016

An Examination of the Cross Reactivity of Human and Equine γG Globulins and Their Fragments by Immunodiffusion. Peter Z. Allen, Barbara M. Berger and Charles M. Helms. 1023

Studies on Organ Specificity. XX. Molecular Forms in the Antibody Response to Isoinmunization with Thyroid Protein. Sidney Shulman, Mohammad Ghayasuddin and Ernest Witebsky. 1059

Stabilization of Cytotoxic Antibody and Complement with Cysteine. Gail Lorenz Miller and Jean E. Wilson. 1074

IMMUNOGENETICS

Isoantigens of Thyroglobulin and Their Significance in Experimental Autoimmune Thyroiditis. Robert M. Nakamura and William O. Weigle. 876

CELLULAR IMMUNOLOGY

Transfer with RNA Extracts of the Cell Migration Inhibition Correlate of Delayed Hypersensitivity in the Guinea Pig. R. E. Jureziz, D. E. Thor and S. Dray. 823

Delayed Hypersensitivity and Arthus Reactivity in Relation to Host Resistance in Salmonella-Infected Mice. F. M. Collins and G. B. Mackaness. 830

Recovery of Delayed-Type Hypersensitivity in Mice following Suppressive Doses of X-Radiation. A. Volkman and F. M. Collins. 846

Comparative Sensitivities of the Hemolytic Plaque-in-Agar and Microchamber Assays for Detection of Rabbit Immune Cells. Bruce Merchant and Bruce Petersen. 880

The Effect of Passive Antibody on Protein Synthesis in Lymph Node Cells of Immunized Rats. Leonard J. Greenberg and Jonathan W. Uhr. 885

Primary Stimulation of Rat and Mouse with Hemocyanin in Solution and Adsorbed on Bentonite. Ruth Gallify and Justine S. Garvey. 924

Effects of Radiation on Direct and Developed Spleen Hemolysin Plaque-Forming Cells of Mice. Edwin M. Uyeki and Robert S. Klassen. 973

Immunoglobulin Production in Bronchial Mucosa and Bronchial Lymph Nodes, Particularly in Cystic Fibrosis of the Pancreas. Francisco J. Martinez-Tello, Dietmar G. Braun and William A. Blanc. 989
CONTENTS

IN VITRO STUDIES ON THE MECHANISM OF MACROPHAGE MIGRATION INHIBITION IN TUBERCULIN SENSITIVITY.
E. R. Heise, S. Han and R. S. Weiser ...................................................... 1004

A STUDY OF VARIABLES IN THE ASSAY OF CYTOTOXIC ANTISERA.
Gail Lorenz Miller and Jean E. Wilson ...................................................... 1068

SPECIFICITY OF CYTOTOXIC HETERLOGOUS ANTISERUM TO CULTURED HUMAN CANCER CELLS.
Gail Lorenz Miller and Jean E. Wilson ...................................................... 1078

γ GLOBULIN SYNTHESIS IN PREGNANT RABBITS.
Natalie Aronson ................................................................. 1083

IMMUNOPATHOLOGY

EFFECTS OF CHRONIC BRONCHOPULMONARY DISEASE AND AGING ON HUMAN NASAL SECRETION IgA CONCENTRATIONS.
Robert H. Alford ........................................................................... 984

HORMONES AND IMMUNOLOGIC CAPACITY. I. EFFECT OF HETEROLOGOUS ANTI-GROWTH HORMONE (ASTH) ANTISERUM ON THYMUS AND PERIPHERAL LYMPHATIC TISSUE IN MICE. INDUCTION OF A WASTING SYNDROME.
Walter Pierpaoli and Ernst Sorkin ...................................................... 1036

MICROBIAL AND VIRAL IMMUNOLOGY

SUCCULING MOUSE CATARACT AGENT (SMCA) IN MICE. III. THE ANTIGENIC SPECIFICITY OF MATERNAL PROTECTION AGAINST SMCA, AND THE COMPARATIVE ABILITY OF OTHER VIRUSES TO REPlicate IN THE EYE OF THE SUCCULING MOUSE.
H. Fred Clark and David T. Karzon ...................................................... 890

SEROLOGIC RELATIONSHIP OF A SIMIAN HERPES VIRUS (SA8) AND HERPES SIMPLEX VIRUS; HETEROGENEITY IN THE DEGREE OF RECIPROCAL CROSS-REACTIVITY SHOWN BY RABBIT 7S AND 19S ANTIBODIES.
David A. Stevens, Theodore Pincus, Mary Alice K. Burroughs and Berge Hampar ........ 979

COMMUNICATIONS

A DEFECT IN CIRCULATING MONONUCLEAR PHAGOCYTES IN CHRONIC GRANULOMATOUS DISEASE OF CHILDHOOD.
William C. Davis, Heinz Huber, Steven D. Douglas and H. Hugh Fudenberg ...................................................... 1093

THE EFFECT OF C3 INACTIVATOR AND CU-CHLOROPHYLLIN ON THE PRAUSNITZ-KUSTNER REACTION.
Moto-michi Torisu, Hidekichi Sonozaki, Koji Ito and Satoshi Shiraishi ........ 1095

RAPID INDUCTION OF EXPERIMENTAL ALLERGIC THYROIDITIS IN RATS SENSITIZED TO THYROID-ADJUVANT AND PERTUSSIS VACCINE.
Philip Y. Paterson and Diane G. Drobish ...................................................... 1098

SERUM 19S AND 7S DEMYELINATING ANTIBODIES IN MULTIPLE SCLEROSIS.
Peter C. Dowling, Seung U. Kim, Margaret R. Murray and Stuart D. Cook ...................................................... 1101

Announcement ................................................................................ 1104

NUMBER 6, DECEMBER 1968

IMMUNOCHEMISTRY

ANTIGENIC HETEROGENEITY OF REDUCED AND ALKYLATED SUBUNITS OF HUMAN MONOCLONAL MACROGLOBULINS.
Carlos J. Dominguez, Vincent Caggiano, Shaul Kochwa and Louis R. Wasserman ................. 1159

STUDIES OF AN ADDITIONAL KINDRED WITH HETEROGENEOUS DEFICIENCY OF THE SECOND COMPONENT OF HUMAN COMPLEMENT (C2) AND DESCRIPTION OF A NEW METHOD FOR THE QUANTITATION OF C2.
Neil R. Cooper, Robert ten Bensel and Peter F. Kohler ...................................................... 1176

IMMUNOCHEMICAL STUDIES OF FOOT-AND-MOUTH DISEASE. IV. PREPARATION AND EVALUATION OF ANTISERA SPECIFIC FOR VIRUS, VIRUS PROTEIN SUB-UNIT AND THE INFECTION-ASSOCIATED ANTIGEN.
K. M. Cowan ................................................................. 1183

DELAYED CONTACT SENSITIVITY TO CATECHOLS. IV. STEREOREGULAR CONFORMATION OF THE ANTIGENIC DETERMINANT.
Harold Baer, Charles R. Dawson and A. Peter Kurtz ...................................................... 1243

LIGHT CHAIN DETERMINANTS OF EXOCRINE ISOAGGLUTININS.
Nicolas Costea, Vincent Yakulis, John Schmale and Paul Heller ...................................................... 1248

HETEROGENEITY OF RABBIT ANTI-OVALBUMIN ANTIBODIES SENSITIZING HUMAN, GUINEA PIG AND RABBIT SKIN.
Hal B. Richerson, H. F. Cheng and Paul M. Sebohm ...................................................... 1291

ANTIGENIC DETERMINANTS OF HUMAN IgM REQUIRING INTERACTION OF μ- AND κ- CHAINS.
Edward J. Miller and William D. Terry ...................................................... 1300

THE PURIFICATION AND REACTIVITY OF THE FIRST COMPONENT OF COMPLEMENT FROM GUINEA PIG, HUMAN AND CANINE SERA.
Noboru Tamura and Robert A. Nelson, Jr ...................................................... 1333

CELLULAR IMMUNOLOGY

SYNTHESIS AND SECRETION OF IMMUNOGLOBULINS BY ESTABLISHED CELL LINES OF HUMAN HEMATOPOIETIC ORIGIN.
Yoichi N. Matsumo, M. Takahashi, Y. Yagi, G. E. Moore and D. Pressman ...................................................... 1111
The Immunological Responses of the North American Opossum (Didelphys virginiana). David L. Taylor and Robert Burrell ................................................................. 1207

The Differential Fate of Soluble Antigen and Antigen-Antibody Complexes in Rabbits and Their Effect on Antibody Response. Roy Patterson, Irena M. Suszko and Catharine H. Talbot .... 1217

Antibody-Producing Cells in Rabbits Injected with Soluble BSA. I. Hemolytic Plaque Assay. J. C. Daniels and William O. Weigle ...................................................... 1223

Antibody-Producing Cells in Rabbits Injected with Soluble BSA. II. Kinetics and Dose Response. J. C. Daniels and William O. Weigle .... .................................................... 1230

Suppression of Murine Allotypic Specificities in Animals with a Complement Defect and in Animals with a Complete Hemolytic Complement System. Bernhard Cinader and S. Dubiski .... 1236

Initiation of Primary-Type and Secondary-Type Antibody Responses to Bacteriophage εX174 in Vitro. Tien-Wen Tao .................................................. . .............. 1253

Cluster Formation in Vitro by Mouse Spleen Cells and Sheep Erythrocytes. G. M. Shearer and G. Cudkowicz ............................................................................. 1264

Studies on Heterologous Antilymphocyte and Antithymocyte Sera. II. Effect on Cellular Antibody Production during the Early Primary and Secondary Immune Response of Mice to Sheep Erythrocytes. Rolf F. Barth and Joanne Southworth .......... 1283

The X-Y-Z Scheme of Immunocyte Maturation. VI. The Nature of Anti-BSA Produced upon Spontaneous Escape from Immune Paralysis. Stanley J. Dowden and Eli Sercarz .... 1308

Interactions of Sensitized Lymphoid Cells and Homologous Target Cells in Tissue Culture and in Grafts: An Electron Microscopic and Immunofluoroscence Study. Leon Weiss ........................................ 1346

IMMUNOPATHOLOGY

The Allergic Response of Rabbit Platelets. I. Membrane Permeability Changes. Reuben P. Siraganian, Antonio G. Secchi and Abraham G. Osler ...................................................... 1130

The Allergic Response of Rabbit Platelets. II. Dependence on Magnesium. Reuben P. Siraganian, Antonio G. Secchi and Abraham G. Osler ...................................................... 1140

MICROBIAL AND VIRAL IMMUNOLOGY

Effect of Anti-Hamster Thymocyte Serum on Papovavirus SV40-Induced Transplantation Immunity. Satvir S. Tevethia, Gordon R. Dreesman, Robert N. Lausch and Fred Rapp ............... 1105

Enhancement of Influenza Virus Multiplication by Chicken Serum. Igor Tamm .......... 1121

Lack of Relationship between Virus-Specific Surface and Transplantation Antigens in Hamster Cells Transformed by Simian Papovavirus SV40. Satvir S. Tevethia, George Th. Diamandopoulou, Fred Rapp and John F. Enders .......... 1192

Immune Lysis of Rabies Virus-Infected Cells. T. J. Wiktor, E. Kuwert and H. Koprowski .......... 1271

COMMUNICATION

Prenatal Immunization of the Lamb to Brucella: Dissociation of Immunocompetence and Reactivity. M. Richardson, C. C. Beck and D. T. Clark ........................................ 1363
