CONTENTS

NUMBER 1, JANUARY 1969

IMMUNOCHEMISTRY

Role of Fumaropimaric Acid in Guinea Pig Complement Dependent and Non-Complement Dependent Biologic Reactions. I. Inhibition of Forssman, Reversed Passive Arthus, and PCA Reactions by Fumaropimaric Acid. M. Michael Glovsky, Peter A. Ward, Elmer L. Becker and Noah J. Halbrook.................. 1

Protein-Carbohydrate Interaction. XVII. The Effect of Polysaccharide Molecular Weight on the Concanavalin A-Polysaccharide Precipitation Reaction. Lucy L. So and I. J. Goldstein........ 53

Physicochemical Properties of Human Reaginic Antibodies. VIII. Effect of Reduction and Alkylation on γE Antibodies. Kimishige Ishizaka and Teruko Ishizaka.................... 69

Purification of Two Protein Antigens by Dissociation from Thioldated Antibody. Benjamin Wolf and Harriet Izenberg........................................ 123

Hereditary Deficiency of the Second Component of Complement in Man: An Immunochemical Study. Martin R. Klempner.................................................. 168

Two Antigenic Subtypes of Human Lambda Immunoglobulin Chains. Frank W. Tischendorf and Elliott F. Osserman.......................... 172

Studies on the Chemical Structure and the Antigenic Determinant of Type II Antigen of Group F Streptococci. Marc F. Michel, Jeanette van Vorno and Richard M. Krause............ 215

Immunoglobulins of the Rhesus Monkey (Macaca mulatta). II. Properties of Rhesus IgG and IgM Antibody in Hemagglutination, Precipitation and Skin Sensitization. James D. Lakin, Roy Patterson and Jacob J. Puzansky........ 253

CELLULAR IMMUNOLOGY

Water Soluble Guinea Pig Transplantation Antigen from Carcinogen-Induced Sarcomas. B. D. Kahan, E. C. Holmes, R. A. Reisfeld and D. L. Morton.......................... 28

Delayed Hypersensitivity to Purified Streptococal M Protein in Guinea Pigs and in Man. Edwin H. Beachey, Humberto Alberti and Gene H. Stollerman.............. 42

Antibody Elicited by Brucella abortus Antigen in Vitro: Prolonged Production by Cell Suspensions. Marvis Richardson........................................ 77

Reversal of Post-Thymectomy Wasting in Mice with Immunocompetent Cells: Influence of Histocompatibility Differences. O. Stutman, E. J. Yunis and R. A. Good...... 87

A Neutrophil Chemotactic Factor from Human C5’. Peter A. Ward and Larry J. Newman........ 93

The Effects of Single Low Antigen Doses on Immunologic Responsiveness in Adult Rabbits. Sumner C. Kraft and Richard M. Rothberg................................. 100

Mixed Lymphocyte Blastogenesis in Response to Multiple Histocompatibility Antigens. Daniel G. Colley and Charles W. DeWitt................................. 107

A Cytotoxic Antiglobulin Technique for Assay of Antibodies to Histocompatibility Antigens. Leroy Fass and Ronald B. Herberman............................. 140

Effect of Antilymphocytic Serum on Rat Lymphocytes. Ruth W. Tyler, N. B. Everett and M. Roy Schwarz................................................................. 179

The Effect of Immunologically Induced Lymphopenia on Antibody Formation. John Baun, George Lieberman and Eugene P. Frenkel.................. 187

Immunologic Tolerance to Sulfanilic Acid Assessed by the Hapten-Specific Hemolytic Plaque Technique. Tomáš Hraba and Bruce Merchant........ 229

IMMUNOPATHOLOGY

Facilitatory and Inhibitory Effects of Phytohemagglutinin on Experimental Allergic Encephalomyelitis in Guinea Pigs. Cheng-Mei Shaw ................................................ 63
Characterization of a Soluble Cytoplasmic Antigen Reactive with Sera from Patients with Systemic Lupus Erythematosus. Geoffrey Clark, Morris Reichlin and Thomas B. Tomasi, Jr... 117
Two Mechanisms of Immunologically-Induced Injury to Rabbit Platelets. Roger M. des Prsz and Richard E. Bryant........................................ 241

MICROBIAL AND VIRAL IMMUNOLOGY
Poliovirus Antibody Response in Serum and Nasal Secretions following Intranasal Inoculation with Inactivated Poliovaccine. Pearay L. Ogra and David T. Karzon ..................... 15
Effect of DEAE-Dextran on Interferon Production and Protective Effect in Mice Treated with the Double-Stranded Polynucleotide Complex Polynucleosinic-Polyribaslic Acid. F. Dianzani, G. Rita, P. Cantagalli and S. Gagnoni .......................... 24
Immune Response of Cattle to Different Serotype Antigens in Monovalent and Trivalent Foot-and-Mouth Disease Vaccines. J. H. Graves .............................................. 58
Endotoxin-Induced Modification of Plasmodium berghei Infection in Mice. Rob Roy MacGregor, John N. Sheagren and Sheldon M. Wolff .................................................. 131
Induction of Ocular Resistance to Vaccinia Virus by Typhoid Vaccine: Role of Interferon. Jang O. Oh and Chieko Yoneda ................................................................. 145

COMMUNICATIONS
Preparation of Rabbit Immune Serum with Neutralizing Activity against a Simian Cytomegalovirus (SA6). D. V. Ablashi, L. M. Martos, R. V. Gilden and B. Hammar 263
Induction of Tolerance in Immunologically Competent Primates. Richard J. Howard, John C. Landon, Suane F. Dougherty, Abner L. Nontins and Stephan E. Mergenhagen 266
The Fixation of Guinea Pig Complement by γ1 and γ2 Immunoglobulins. Abraham G. Osler, Benedito Oliveira, Hyua S. Shin and Ann L. Sandberg .................................... 269

NUMBER 2, FEBRUARY 1969
IMMUNOCHEMISTRY
Studies on Human Antibodies. VII. Acrylamide Gel Electrophoresis of Purified Human Antibodies and Myeloma Proteins, Their Heavy and Light Chains. Marianne M. Dorner, William J. Yount and Elvin A. Kabat ............................................................... 273
The Relationship of the Hemolytic Activity of Active C1’s to Its TAME Esterase Action: A New Method of Purification and Assay. K. Nagaki and R. M. Stroud ................. 421
Comparisons of Reaginic Antibodies from Three Species. Roy Patterson, Mary Roberts and Jacob J. Puzansky ................................................................. 466
Studies on Cryoprecipitation. II. Immunochemoaical Characterization of a Human Cryoglobulin. Anil Saha, Sheldon Sambury, Kenwyn Smart, Douglas C. Heiner, Austin U. Sargent and Bram Rose ................................................................. 476
Cleavage of the Fe Fragment of IgA. Vincent Yakulis, Nicolas Costea and Paul Heller ................................................................. 488
Quantitative Estimation of Antibodies in Different Immunoglobulin Classes. Giorgio Torrigiani and Ivan M. Roitt ................................................................. 492
Molecular Heterogeneity of Immunoglobulin-M (γM-Globulin). Alan Solomon ................................................................. 496

CELLULAR IMMUNOLOGY
Isoantigens Available to Circulating Antibodies. Isaac Witz, Nathan Kalise and David Pressman ................................................................. 283
The Immunologic Memory of LAF Mice following a Single Injection of Sheep Red Cells. Jevrosima Radovich, Helen Hemingsen and David W. Talmage ................................................................. 288

CONTENTS

Impunoehemical Study of Hemoglobin-Free Human Erythroeyte Membranes. Calderon Howe and Lucille T. Lee .............................................................. 573
A Glycoprotein That Induces Nephrotoxic Antibody: Its Isolation and Purification from Rat Glomerular Basement Membrane. Seiichi Shibata, Yuzo Miyakawa, Takuji Naruse, Toshihiko Nagasawa and Takehide Takuma .................................................. 593
Use of Insoluble Antibody for Quantitative Determination of Small Amounts of Immunoglobulin. Dean Mann, Harriet Granger and John L. Fahey ................................................................. 618
Studies on IgA. I. Fractionation Procedure for Isolation of IgA from Pooled Normal Human Plasma. Rainer H. Zschocke, Hans G. Griebte, Gerhard L. Bach and Truman O. Anderson . 625
Hapten-Specific Insoluble Immunoabsorbents Prepared from Hide Powder (Collagen). Bernard B. Levine and Vera Levystska .............................................. 647
Occurrence and Properties of Rabbit IgG Antibody. L. S. Rodkey and M. J. Freeman .................. 713
Immunogenicity of a Fragment of Human Serum Albumin. Claude Lapresle and Irwin J. Goldstein ............................................................ 733

IMMUNOGENETICS
Identification and Genetic Control of Three Rabbit γA Immunoglobulin Allotypes. Thomas P. Conway, Sheldon Dray and Edward A. Lichter ......................................................... 544
Delineation of Two Antigenic Markers, "Non a" and "Non g" Related to the Genetic Antigens of Human Globulin. Jacob B. Natvig, Henry G. Kunkel and Fenneke G. Joslin ........................................ 611

CELLULAR IMMUNOLOGY
Effect of Serum on Cells Producing Hemolytic Antibodies in Short-Term Experiments In Vitro. H. Strander ........................................................................ 602
In Vitro and in Vivo Properties of Antimacrophage Sera. M. S. Hirsch, G. W. Gary, Jr. and F. A. Murphy .............................................................................. 656
Development and Function of the Immunoglobulin-Producing System. II. Role of the Bursa in the Development of Humoral Immunological Competence. W. A. Cain, M. D. Cooper, P. J. Van Alten and R. A. Good ........................................................ 671
Characteristics of Some "Natural" Autoantibodies in Rabbits. Noel R. Rose and Constance E. Brinckerhoff ............................................................... 682
Myeloplasmaidal Effect of Polymorphonuclear Leukocyte Extract. Adnan S. Dajani and Elia M. Ayoub ................................................................................. 698
Isologons and Homologous Lymphoid Transplants. II. Isolation of Three Stages of Immunoglobulin Production in the Differentiation of the Primary Immune Response to Protein Antigen. Newton E. Hyslop, Jr. and Sanford H. Stone ................................................... 751
Subtypes of Human ABO Blood Groups and Subtype-Specific Antibodies. O. Mäkelä, E. Ruoslahti and C. Ehnholm ........................................................... 763

MICROBIAL AND VIRAL IMMUNOLOGY
Antibody Responses in Nasal Secretions and Serum of Elderly Persons following Local or Parenteral Administration of Inactivated Influenza Virus Vaccine. Julius A. Kasel, Evan B. Hume, Robert V. Fulk, Yasushi Togo, Margret Huber and Richard B. Hornick .............................................. 555
Relationship between Viremia and Interferon Production of Japanese Encephalitis Virus. Hinae K. Rokutanda ........................................................................ 662
CONTENTS

1969]

Latex Reagent for Determining IgM Levels in Cord and Newborn Sera. John L. Sever, Edward
Shanbrom, Robert Steinmeier, Steven A. Schacher, George McCracken and David A. Fuccillo. 679
The Effect of Induced Isohemagglutinin on the Course of Blood-Induced Plasmodium lophurae
Infections in Chickens. L. L. Congdon, J. N. Farmer and R. P. Breitenbach. 688
Neutralizing Antibody Complex of Infectious Bronchitis Virus. M. F. Stinski and C. H.
Cunningham. 720
Biologic and Immunologic Characteristics of Cold-Adapted Influenza Virus. H. R. Maassab. 728
Lysozyme and β-Lysin Release Stimulated by Antigen-Antibody Complexes and Bacteria. John
G. Tew, W. M. Hess and David M. Donaldson. 743
A Mathematical and Experimental Study of the Kinetics of Neutralization of Bacteriophage
φX 174 by Antibodies. William M. Krummel and Jonathan W. Uhr. 772

COMMUNICATIONS

Inhibition of the Mixed Leukocyte Culture Reaction (MLC) by Pre-incubation of the Leukocytes
with Sucrose. Harold N. Rode and Julius Gordon. 786
DNA-Binding Assay for Detection of Anti-DNA Antibodies of NZB/NZW F1 Mice. Alfred D.
Steinberg, Theodore Fineus and Norman Talal. 788
Lack of Skin-Sensitizing Property of γD Myeloma Protein in Guinea Pigs. Zoltan Ovary. 790

SPECIAL ANNOUNCEMENT

A Reference Preparation for Human Serum Immunoglobulins. D. S. Rowe, S. G. Anderson and
J. L. Fahey. 792

NUMBER 4, APRIL 1969

IMMUNOCHEMISTRY

Inhibition of the Lytic Effect of Guinea Pig Complement by Rabbit Complement. Raymond A.
Kempf, Irma Gigli and K. Frank Austen. 795
Passive Immune Lysis with Chronic Chloride-Treated Erythrocytes. Philip J. Perucca, W.
Page Faulk and H. H. Fudenberg. 812
Immunochromic Studies on Blood Groups. XLII. Isolation and Characterization from Ovarian
Cyst Fluid of a Blood Group Substance Lacking A, B, H, Le^a and Le^b Specificity. Giuseppe
Vicari and Elvin A. Kabat. 821
A Comparative Antigenic Study of γE-Globulin and Myeloma-IgND. Hans Bennich, Kimishige
Ishizaka, Teruko Ishizaka and S. Gunnar Johansson. 826
A Comparison of Seven Procedures to Detect the Primary Binding of Antigen by Antibody. Persy
Minden, Bascom F. Anthony and Richard S. Farr. 832
Presence of L-L Intercist Chain Disulfide Bonds in Reconstituted γM Molecules. Howard M. Grey. 848
Immunochromic Studies on the Cross-Reactivity between Streptococcus bovis, Strain S19, and
Group A Streptococcal Carbohydrates. Judith A. Kane and Walter W. Karakawa. 870
Studies on Brain Antigens. II. Water Soluble Antigenic Proteins of Bovine Brain. Victor B.
Hatcher and Catherine F. C. MacPherson. 877
Histamine Release from Human Leukocytes by Anti-γE Antibodies. Teruko Ishizaka, Kimishige
Ishizaka, S. Gunnar O. Johansson and Hans Bennich. 884
Some Characteristics of the Antigenic Moiety of Calfskin Collagen. E. Carwile LeRoy. 919
Factors Influencing the Production of Early, Heat Labile, Rabbit Anaphylactic Antibody.
Nathan J. Zvaifler and Jennifer O. Robinson. 947
Immunoglobulins of the Rhesus Monkey (Macaca mulatta). III. Structure and Activity of Rhesus
IgG and IgM Antibodies Synthesized in the Primary Response and in the Hyperimmune
State. James D. Lakin, Roy Patterson and Jacob J. Pruzansky. 975
Immune Hemolysis: Serial Studies on the Dissociability of IgG and IgM Anti-Forssman Anti-
bodies Using the C'1a Fixation and Transfer Technique. William D. Linscott. 986
The Effects of Ionic Strength, Temperature, and Antibody Class and Avidity on Fixation and
Transfer of the First Component of Complement. William D. Linscott. 993
Structural Analysis of a Slowly Sedimenting Proteolytic Fragment of Human Immunoglobulin M.
Anne Goodman and F. P. Inman. 1032
Biologic Activity and Morphology of Three Types of Rabbit IgM Antibody Subunits. Bruce Chesebro and Sven-Eric Svejag ........................................................... 1064

CELLULAR IMMUNOLOGY

An Isotopic Antiglobulin Technique for Measuring Antibodies to Cell-Surface Antigens. F. C. Sparks, C. C. Ting, W. G. Hammond and R. B. Herberman .................................................. 842
The Immune Response of Mice to Keyhole Limpet Hemocyanin Bound to Macrophages. Emil R. Unanue ................................................................. 893

A Method for the Immunoadsorption of Cells to an Antibody-Coated Polyurethane Foam. Warren H. Evans, Michael G. Mage and Elbert A. Peterson .................................................. 899
Enrichment of Antibody Plaque-Forming Cells by Immunoadsorption to an Antigen-Coated Polyurethane Foam. Michael G. Mage, Warren H. Evans and Elbert A. Peterson .................................................. 908
Use of Thymectomized, Irradiated Rats to Study Immunogenicity of Bovine γ Globulin. R. Michael Williams and Byron H. Waksman .................................................. 925
Studies on Heterologous Antilymphocyte and Antithymocyte Sera. III. Differential Effects of Rabbit Anti-Mouse Sera on Splenic Lymphocytes and Macrophages. Rolf P. Barth, Robert L. Hunter, Joanne Southworth and Alan S. Rabson .................................................. 932
Do Antibody-Forming Cells Circulate in the Blood? Jeffrey M. Roseman, Lee D. Leserman, Frank W. Fitch and Donald A. Rowley .................................................. 1002
The Immunosuppressive Effect of Passively Administered Antibody IgG Fragments. Jean-Charles Cerottini, Patricia J. McConahey and Frank J. Dixon .................................................. 1008

Graft Versus Host Inhibition. I. Incubated Parental Strain Spleen and Liver Cells Administered to F1 Mice. Mortimer M. Bortin, Alfred A. Rimm and Edward C. Saltzstein .................................................. 1042
Studies of the Chicken Immune Response. III. Cellular and Humoral Antibody Production in the Splenectomized Chicken. Sister Danile Keily and Peter Abramoff .................................................. 1058
Delayed Hypersensitivity. III. Effect of Pre-exposure to Antigen upon Macrophage Migration: Eleanor A. Lipsmeyer and Fred S. Kantor .................................................. 1074
Antigen-Induced Cell Proliferation in Cultures from Antibody-Deficient Chickens. H. J. Meuwissen, P. J. Van Alten and R. A. Good .................................................. 1079

Differentiation of Antibody-Forming Cells. II. Effect of Antigen Dose on Proliferation of Precursor Cells and Plaque-Forming Cells. Priscilla A. Campbell and Phyllis Kind .................................................. 1084

IMMUNOPATHOLOGY

The Effect of Intravenous Antigen on Circulating Monocytes in Animals with Delayed Hypersensitivity. Takeshi Yoshida, Baruj Benacerraf, Robert T. McCluskey and Pierre Vassalli .................................................. 804
Lymphocyte in Viro Cytotoxicity: Mechanism of Lymphotoxin-Induced Target Cell Destruction. Terry W. Williams and Gale A. Granger .................................................. 911
Wasting Disease Induced with Cortisol Acetate. III. Immunologic Studies. John W. Jutilla .................................................. 963

MICROBIAL AND VIRAL IMMUNOLOGY

Extracellular Esterases of Streptococci and the Distribution of Specific Antibodies in Human Sera of Various Age Groups. Aaron H. Stock and Raymond J. Lynn .................................................. 859
Development of Humoral and Cell-Mediated Immunity to Lymphocytic Choriomeningitis Virus in the Mouse. Jørgen Hannover Larsen .................................................. 941
Antibodies to Herpesvirus hominis Types 1 and 2 in the Rabbit. André J. Nahmias, Walter R. Dowdle, Joel H. Kramer, Carolyn F. Luce and S. Cleo Mansour .................................................. 956

Physical Characteristics of Rubella Virus. Kendall O. Smith and Thomas E. Hobbs .................................................. 1016
CONTENTS ix

Development of an Attenuated Mumps Virus Vaccine. II. Immune Response of Animals to Vaccination with Inactivated and Live Attenuated Mumps Viruses. Grace Shramek and Friedrich Deinhardt ................................................................. 1093

COMMUNICATIONS

Distribution of Keto-Deoxyoctonic Acid and Sialic Acid in N. meningitidis. Eberhard Hackenthal ................................................................. 1099

Antibody Responses in Children and Elderly Persons following Local or Parenteral Administration of an Inactivated Influenza Virus Vaccine, A/Hong Kong/68 Variant. Robert V. Fulk, David S. Fedson, Margret A. Huber, James R. Fitzpatrick, Bruce F. Howar and Julius A. Kasel ................................................................. 1102

The Subunit Structure of Influenza Virus Envelope Protein. Edward A. Eckert .................. 1105

NUMBER 5, MAY 1969

IMMUNOCHEMISTRY

Immunochemical Relationships of Certain Streptococcal Group and Type Polysaccharides to Pneumococcal Capsular Antigens. Michael Heidelberger, Jan M. N. Willers and Marc F. Michel ................................................................. 1119

Quantitative Precipitin Analysis of Influenza Virus Host Antigen and of Sulfated Mucopolysaccharides of Chicken Embryonic Allantoic Fluid. Lucille T. Lee, Calderon Howe, Karl Meyer and Haing U. Choi ................................................................. 1144

Anti-Immunoglobulin Control of Immune Hemolysis. J. A. Romeyn and Stephen Ross ................................................................. 1242

Preparation of Fluorescent Antibody Reagents Monospecific to Light Chains of Human Immunoglobulin. Morinobu Takahashi, Yasuo Yagi and David Pressman ................................................................. 1268

Induction of Immunity and Immunologic Paralysis in Mice against Polyvinyl Pyrrolidone. Birger Andersson ................................................................. 1309

IMMUNOGENETICS

A New Allotypic Antigen of Rabbit Colostral γA Immunoglobulin. Tohru Masuda, Kagemasa Kuribayashi and Massao Hansoka ................................................................. 1156

Detection of Rabbit Pancreas-Specific Isoantibodies by Bis-Diazotized Benzidine Hemagglutination. Constance E. Brinckerhoff and Noel R. Rose ................................................................. 1208

CELLULAR IMMUNOLOGY

Isolation and Characterization of Free λ Chain of Immunoglobulin Produced by an Established Cell Line of Human Myeloma Cell Origin. I. λ Chain in Culture Medium. Y. Matsuoka, Y. Yagi, G. E. Moore and D. Pressman ................................................................. 1136

Immunologic Unresponsiveness in the Adult Guinea Pig. IV. Induction of Unresponsiveness with Aggregated Serum Proteins. Harold F. Dvorak, Blanche A. Simpson and Robert C. Best, Jr. ................................................................. 1163

Ca++-Dependent Binding of Antibody-19 S Antibody Complexes to Macrophages. Waltraut H. Lay and Victor Nussenzweig ................................................................. 1172

Local Plasmaerythropoiesis in Delayed Hypersensitivity Reactions. M. H. Flax, J. H. Elliott, J. J. Daly, K. Willms-Kretschmer, J. S. McCarthy and S. Leskowitz ................................................................. 1214

The Response of Long- and Short-Lived Small Lymphocytes of the Rat to Pokeweed Mitogen. Larry Stayner and M. Roy Schwarz ................................................................. 1260

Pattern of Immunoglobulin Production in Individual Cells of Human Hematopoietic Origin in Established Culture. Morinobu Takahashi, Yasuo Yagi, George E. Moore and David Pressman ................................................................. 1274

Coccidioidin Delayed Hypersensitivity: Skin Test and in Vitro Lymphocyte Reactivities. Burton Zweiman, Demeosthenes Pappagianis, Howard Maibach and Eugene A. Hildreth ................................................................. 1284

Antigen-Antibody Reactions in Agar. VIII. Treatment of Antisera and Optical Densities of Precipitin Reactions. Alonza R. Hayden and Elmer L. Becket ............................... 1398

The Enhancement of Antibody Formation by *Escherichia coli* Lipopolysaccharide and Detoxified Derivatives. Jay R. Schenck, Martha P. Hargie, Mickey S. Brown, Donna S. Ebert, Agnes L. Yoo and Floyd C. McIntire ............................................................ 1411

Immunoochemical Studies in Cobrotoxin. C. C. Chang and C. C. Yang .......................... 1437

Studies on Thyroglobulin Immunity. VI. Thyroid Hormones and Thyroglobulin Specificity. S. S. Margherita and B. N. Premachandra ................................................ 1511

**IMMUNOGENETICS**

Comparison of AA1 Allotypic Specificity Carried by Rabbit IgG and IgM. Mariangela Segre, Diego Segre and F. P. Inman .............................................................. 1368

Availability of Transplantation Alloantigens to Circulating Antibodies: Studies with Alloantibodies of Known Specificity. Isaac Witz, Gustavo Cudkowicz and David Pressman ....................... 1373

Individual Patterns of Ram Seminal Antigens. Abraham C. Kulangara .................................. 1445

Immunoglobulin Synthesis by Cultured Mouse Myeloma Cells. Yuziro Namba and Masao Hanaoka .................................................................................. 1486

The Influence of Heredity and Environment on Human Immunoglobulin Levels. M. Allansmith, B. McClellan and M. Butterworth ......................................................... 1504

**CELLULAR IMMUNOLOGY**

Inhibition of *in Vitro* Cell Migration in Experimental Allergic Encephalomyelitis. Helene C. Rauch, R. W. Ferraresi, S. Raffel and Elizabeth Roboz Einstein ........................................ 1431

Inhibition of Macrophage Migration by a Skin-Reactive Polysaccharide from BCG Culture Filtrates. H. P. Godfrey, Harold Baer and S. D. Chaparas .................................. 1466

**IMMUNOPATHOLOGY**

Antigens of Normal and Atherosclerotic Intima. Hans W. Intorp, Felix Milgrom and Ernest Witebsky .......................................................... 1404

The Effect of Antilymphocytic Serum (ALS) on the Reticuloendothelial System (RES) of Mice. Villis R. Marshall and Peter R. Knight .................................................. 1498

**MICROBIAL AND VIRAL IMMUNOLOGY**

The Serum Bactericidal Reaction. III. Antibody and Complement Requirements for Killing a Rough *Escherichia coli*. John N. Goldman, Shaun Ruddy, K. Frank Austen and David S. Feingold ........................................ 1379

Distribution of Poliovirus Antibody in Serum, Nasopharynx and Alimentary Tract following Segmental Immunization of Lower Alimentary Tract with Poliovaccine. Pearay L. Ogra and David T. Karzon ........................................ 1423

Immobilizing Antibodies in Pyelonephritis. George J. Pazin and A. I. Braude ........................................ 1454

**COMMUNICATIONS**

Unusual Conditions for Crystallization of the Fe Fragment of Chicken IgG. Ralph T. Kubo and Albert A. Benedict ........................................ 1523

Reactivity of Human Lymphocytes to Autologous and Homologous Serum. Allen B. Breit and Michael R. Mardiney, Jr. ........................................ 1526
