The Xenogeneic Effect. I. Antigen and Mitogen-Stimulated Human Lymphocytes Produce a Non-Antigen-Human Chorionic Gonadotropin: Effects of Crude and Purified Preparations on Lymphocyte Responses to

Secondary IgG Responses to Type III Pneumococcal Polysaccharide. I. Kinetics and Antigen Requirements.

Triggers Mechanism of B Lymphocytes. II. Induction of Ornithine Decarboxylase in B Cells by Anti-Immunoglobulin and Enhancing Soluble Factor. Takeshi Watanabe, Tadamitsu Kishimoto, Tadao Miyake, Yoshiro Nishizawa, Hideo Inoue, Yoshiro Takeda, and Yuichi Yamamura

B Lymphocyte Differentiation from Fetal Liver Stem Cells in Ss-Treated Mice. Paul W. Kincaide, Malcolm A. S. Moore, Robert A. Schlegel, and John Pye

The Elaboration of Leukotactic Mediators during the Interaction between Parental-Type Lymphocytes and FI

In Vivo Reappraisal of Lymphocyte Classification by Means of Surface Morphology. Paul S. Baur, Gary B. Thurman, and Allan L. Goldstein

Effect of Cortisone on the B Cell Line in Chickens. V. M. Rusu and M. D. Cooper

The Elaboration of Leukotactic Mediators during the Interaction between Parental-Type Lymphocytes and FI Cells. Peter A. Ward and Alvin Volkman

Effect on Tolerance Induction of the Mode of Attachment of the Hapten to the Carrier. Robert S. Paley, Sidney Leskowitz, and Yves Borel

Studies of Thymic Factors. I. Evaluation of the Mouse Rosette Assay for Thymic Hormone. M. Eric Gershwin, Catherine E. Calkins, Joan M. Carboni, and Byron H. Waksman

Secondary IgG Responses to Type III Pneumococcal Polysaccharide. I. Kinetics and Antigen Requirements.

The Xenogeneic Effect. I. Antigen and Mitogen-Stimulated Human Lymphocytes Produc...
