

THE JOURNAL OF IMMUNOLOGY[®]

Official Journal of The American Association of Immunologists □□□

Advances in Immunology

VOLUME 22

edited by FRANK J. DIXON and HENRY G. KUNKEL

This serial publication contains comprehensive articles covering the current research in immunology, especially in its theoretical and fundamental aspects. The contributions are written by authorities in the individual fields considered, and deal with problems of cellular and humoral immunity, such as the nature and biological roles of the antibody response and of delayed type hypersensitivity, the nature and function of complement, immunochemistry, problems of tolerance in relation to trans-

plantation and to tumor immunity, and antigenic differences within and between species.

CONTENTS: C. B. Carpenter *et al.*, The Role of Antibodies in the Rejection and Enhancement of Organ Allografts. H. R. Colten, Biosynthesis of Complement. S. C. Grebe and J. W. Streilein, Graft-versus-Host Reactions: A Review. M. E. Lamm, Cellular Aspects of Immunoglobulin A. Ya. S. Shvartsman and M. P. Zykov, Secretary Anti-Influenza Immunity.

1976, 352 pp., \$24.50/£12.75

Immunobiology of the Macrophage

edited by DAVID S. NELSON

Macrophages in recent years have received increasing attention from immunologists and other investigators. There is now a better appreciation of the wide range of functions which they carry out and a better understanding of the ways in which they do so. *Immunobiology of the Macrophage* provides a comprehensive review of the role of the macrophage in immunobiology, exploring in depth selected aspects of macrophage function, with special emphasis on those areas in which new work is coming to fruition.

CONTENTS: C. W. Pierce and J. A. Kapp, The Role of Macrophages in Antibody Responses *In Vitro*. D. E. Mosier, The Role of Macrophages in the Specific Determination of Immunogenicity and Tolerogenicity. A. Basten and J. Mitchell, Role of Macrophages in T Cell—B Cell Collaboration in Antibody Production. W. S. Walker, Functional Heterogeneity of Macrophages. J. J. Oppenheim and R. C. Seeger, The Role of Macrophages in the Induction of Cell-Mediated Immunity *In Vivo*. A. S. Rosenthal *et al.*, Macrophage Function in Antigen Recognition by T Lymphocytes. D. L. Rosenstreich and J. J. Oppenheim, The Role of Macrophages in the Activation of T and B Lymphocytes *In Vitro*. L. B. Epstein, The Ability of Macrophages to Augment *In Vitro* Mitogen- and Antigen-Stimulated Production of Interferon and Other Mediators of Cellular Immunity by Lymphocytes. D. S. Nelson, Nonspecific

Immunoregulation by Macrophages and Their Products. J. M. Oliver and R. D. Berlin, Macrophage Membranes. V. Defendi, Macrophage Cell Lines and Their Uses in Immunobiology. A. Volkman, Monocyte Kinetics and Their Changes in Infection. R. Snyderman and S. E. Mergenhagen, Chemotaxis of Macrophages. P. C. Wilkinson, Cellular and Molecular Aspects of Chemotaxis of Macrophages and Monocytes. R. V. Blanden *et al.*, Lymphocyte-Macrophage Interactions and Macrophage Activation in the Expression of Anti-Microbial Immunity *In Vivo*. J. R. David and H. G. Remold, Macrophage Activation by Lymphocyte Mediators and Studies on the Interaction of Macrophage Inhibitory Factor (MIF) with Its Target Cell. P. Davies and A. C. Allison, Secretion of Macrophage Enzymes in Relation to the Pathogenesis of Chronic Inflammation. M-L. Lohmann-Matthes, Induction of Macrophage-Mediated Cytotoxicity. R. Keller, Cytostatic and Cytocidal Effects of Activated Macrophages. S. S. Tevethia *et al.*, Macrophages and the Destruction of Syngeneic Virus-Induced Tumors. R. Evans and P. Alexander, Mechanisms of Extracellular Killing of Nucleated Mammalian Cells by Macrophages. O. A. Holtermann *et al.*, Immunotherapeutic Approaches to Tumors Involving the Skin. M. Territo and M. J. Cline, Macrophages and Their Disorders in Man. D. S. Nelson, Macrophages: Perspectives and Prospects.

1976, 656 pp., \$39.00/£20.30

N.B.: Postage plus 50¢ handling charge on all orders not accompanied by payment.

Prices subject to change without notice.

THE JOURNAL OF IMMUNOLOGY®

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to:

Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The *original and two (2) copies* of the manuscript, including references, legends, figures and illustrations, must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least $\frac{3}{16}$ -inch or 5-mm spacing from the bottom of one line to the top of a capital of a succeeding line) on one side of 8½ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. *The format of The Journal must be followed in typing the text and the list of references.* References will be numbered as they appear in the text and will be listed in the format:

1. Kindt, T. J., and W. J. Mandy. 1972. Recombination of genes coding for constant and variable regions of immunoglobulin heavy chains. *J. Immunol.* 108:1110.

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references *must be typed on separate pages*. If abbreviations are to be used in the paper, the abbreviations and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material *must be on glossy paper (in triplicate)*; they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to \$100.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication. Estimates for color photomicrographs are also available.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. For this reason, proofs are not sent to the authors, but rather to the Office of the Editor. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged \$30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of \$30.00 per published page. *No exceptions can be made.*

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.

THE JOURNAL OF IMMUNOLOGY®

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916 to 1925, and in 1928 Volumes I-X inclusive, and Vol. XV published bi-monthly.)

The subscription price is \$80.00 per year in U.S.A.; \$83.75 elsewhere; institutions, \$100.00. Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations in the U.S.A. Single copies, when available, are \$8.50 in U.S.A.; \$8.75 elsewhere. A special rate of \$27.00 is available to Students and Post-Doctoral Fellows. Certification forms may be obtained from the office of the American Association of Immunologists in Bethesda. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Henry Metzger, American Association of Immunologists, 9650 Rockville Pike, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Microfilm. For availability, inquire of The Williams & Wilkins Company.

Reprints of individual articles are available only from authors.
