Microbiological Associates Presents The MASH II & III

MULTIPLE AUTOMATED SAMPLE HARVESTER
For Rapid Harvesting of Labelled Cells

MASH II

MASH III

USES

- Assay of Mixed Lymphocyte Cultures (Histocompatibility Studies)
- In Vitro Lymphocyte Stimulation (Mitogen Studies)
- Drug Sensitivity Testing
- Reactivity to Tumor Cells

ADVANTAGES

- Expedites Processing of Cultures
- Allows Greater Number of Tests per Sample
- Facilitates Replicate Sampling

The Multiple Automated Sample Harvester (MASH) is designed for the rapid harvesting of supernatant fluids of mixed lymphocyte cultures using tritiated thymidine. The unit is designed to permit use of Microtiter plates which require 0.2 ml per culture in contrast to other procedures using larger volumes. Thus, it is possible to prepare a greater number of cultures per sample, improve accuracy between replicate samples and improve efficiency in preparing samples for scintillation spectrophotometry.

COMPARISONS BETWEEN MASH II AND MASH III

FUNCTION	MASH II	MASH III
Wash Fluid Capability	One Wash Fluid	Four Wash Fluids
Delivery system of Wash Fluids	Gravity Flow	Pressurized
Filter Strip Positioning	Manual Clamping of Filter Strip	Air Pressure Clamping of Filter Strip
Aspirator Bar	Manually Moved From Row to Row; Microtiter Plate is Fixed	Aspirator Bar is Fixed and Microtiter Plate Moves

Advances in Immunology, Volume 23

edited by HENRY G. KUNKEL and FRANK J. DIXON

CONTENTS: *K. Ishizaka*, Cellular Events in the IgE Antibody Response. *T. P. King*, Chemical and Biological Properties of Some Atopic Allergens. *B. Dupont et al.*, Human Mixed-Lymphocyte Culture Reaction: Genetics, Specificity, and Biological Implications. *D. M. Marcus and G. A. Schwarting*, Immunochemical Properties of Glycolipids and Phospholipids. 1976, 264 pp., \$22.50/£13.70 ISBN: 0-12-022423-2

Advances in Immunology, Volume 24

edited by FRANK J. DIXON and HENRY G. KUNKEL

CONTENTS: *O. Götze and H. J. Müller-Eberhard*, The Alternative Pathway of Complement Activation. *G. F. Schreiner and E. R. Unanue*, Membrane and Cytoplasmic Changes in B Lymphocytes Induced by Ligand-Surface Immunoglobulin Interaction. *H. B. Dickler*, Lymphocyte Receptors for Immunoglobulin. *R. E. Anderson and N. L. Warner*, Ionizing Radiation and the Immune Response.

1976, about 350 pp., in preparation ISBN: 0-12-022424-0

Lymphocytes and Their Cell Membranes

edited by MICHAEL SCHLESINGER

CONTENTS: *M. Schlesinger*, Preface. *J. M. Yoffey*, Histogenesis of B and T Lymphocytes. *K. Zeiler et al.*, The T Lymphocyte Surface in Development. A Study of the Electrokinetic, Antigenic, and Ultrastructural Properties of T Lymphocytes in Mouse Thymus and Lymph Nodes. *I. L. Weissman et al.*, Differentiation and Migration of T Lymphocytes. *I. F. C. McKenzie et al.*, Differentiation of Antigenic Markers on B Cells and on Antibody-Forming Cells. *A. Polliack et al.*, Scanning Electron Microscopy of Mitogen-Transformed Human Lymphocytes. *P. Hayry et al.*, Fractionation of Immunocompetent Cells by Free-Flow Cell Electrophoresis. *N. A. Staines and J. R. Archer*, Expression of Major Histocompatibility Complex Antigens on Different Cell Types. *G. J. Hammerling and H. O. McDevitt*, Antigen-Binding Structures on the Surface of T Lymphocytes. *K. James et al.*, Studies on the Association of α_2 -Macroglobulin with T, B and K Cells. *J.-L. Touraine*, Human T Lymphocyte Differentiation Antigens. *U. Galili and M. Schlesinger*, Studies on the Formation of E-Rosetts by Human T Lymphocytes and Thymus Cells. Effects of Temperature Metabolic Inhibitors and Anti-T Sera. *M. M. Zaiz*, Effects of Cortisone on Lymphocyte Homing.

(N.B.: This is a hardcover edition of *Israel Journal of Medical Sciences*, Vol. 11, No. 12, December 1975.)

1976, 147 pp., \$14.50/£8.85 ISBN: 0-12-625350-1

Clinical Immunology and Immunopathology

editors: H. HUGH FUDENBERG and ROBERT T. McCLUSKEY

Clinical Immunology and Immunopathology provides an international medium devoted to publication of original investigations concerned with normal and abnormal aspects of clinical immunology and immunopathology. The scope of the journal encompasses the following broad areas: immunodeficiency diseases, lymphoplasmacytic dyscrasias, phagocytic functions and defects therein; immunogenetics, cancer immunology, immunohematology, immunoparasitology, autoimmune diseases, complement, kinases (and other mediators), transplantation immunology, immunoneuropathology, immunopharmacology, allergy, immunocyte function, normal and pathologic, immune complex diseases and other immunologically induced diseases and animal models of human diseases.

VOLUMES 7-8, 1977 (6 issues)

Annual subscription rate, U.S.A.: \$84.00;

outside U.S.A.: \$97.00 (includes \$5.00 postage)

Cellular Immunology

editor-in-chief: H. SHERWOOD LAWRENCE

editorial assistant: D. H. Wetherbee

Cellular Immunology provides an international medium devoted exclusively to publication of original investigations concerned with the immunological activities of cells in experimental or clinical situations. The scope of the journal encompasses the broad area of *in vitro* and *in vivo* studies of cellular immune responses. These include, for example, delayed type hypersensitivity or cellular immunity; immunologic surveillance and tumor immunity; transplantation immunology; autoimmunity, resistance to intracellular microbial and viral infection; immunologic deficiency states and their reconstitution; antigen receptor sites; thymus and lymphocyte immunobiology, etc.

VOLUMES 28-34, 1977 (14 issues)

Annual subscription rate, U.S.A.: \$238.00;

outside U.S.A.: \$282.50 (includes \$9.50 postage)

All journal subscriptions must be paid in advance.

Tissue Typing and Organ Transplantation

edited by EDMOND J. YUNIS, RICHARD A. GATTI, and D. BERNARD AMOS

1973, 497 pp., \$19.50/£11.90 ISBN: 0-12-775160-2

Send payment with book order and save postage plus 50¢ handling charge.

Prices are subject to change without notice.

THE JOURNAL OF IMMUNOLOGY®

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to:

Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The *original and two (2) copies* of the manuscript, including references, legends, figures and illustrations, must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least $\frac{3}{16}$ -inch or 5-mm spacing from the bottom of one line to the top of a capital of a succeeding line) on one side of 8½ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. *The format of The Journal must be followed in typing the text and the list of references.* References will be numbered as they appear in the text and will be listed in the format:

1. Kindt, T. J., and W. J. Mandy. 1972. Recombination of genes coding for constant and variable regions of immunoglobulin heavy chains. *J. Immunol.* 108:1110.

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references *must be typed on separate pages*. If abbreviations are to be used in the paper, the abbrevia-

tions and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

List all components of culture medium used in experiments so that sufficient data to reproduce reported results are available. This information may be supplied in the Abbreviations footnote, in a table listing all components, by referring to a published article containing the information, or by identifying the commercial source which supplies the specific medium if components are listed by the supplier.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material *must be on glossy paper (in triplicate)*; they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or blue-lined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to \$100.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication. Estimates for color photomicrographs are also available.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. For this reason, proofs are not sent to the authors, but rather to the Editor. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged \$30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of \$30.00 per published page. *No exceptions can be made.*

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.

THE JOURNAL OF IMMUNOLOGY®

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916 to 1925, and in 1928 Volumes I-X inclusive, and Vol. XV published bi-monthly.)

Annual Subscription Rates—U.S.A. AND POSSESSIONS: personal, \$80.00; institutional, \$100.00; single copy, \$9.00. FOREIGN: personal, \$85.00; institutional, \$105.00; single copy, \$9.50. Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations. A special rate of \$27.00 (\$32.00 foreign) is available to Students and Post-Doctoral Fellows. Certification forms may be obtained from the office of the American Association of Immunologists in Bethesda. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Henry Metzger, American Association of Immunologists, 9650 Rockville Pike, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Microfilm. For availability, inquire of The Williams & Wilkins Company.

Reprints of individual articles are available only from authors.
