Practice Makes Perfect

We know you count on your medical dictionary. That's why we made Stedman's 23 as perfect as we knew how.

Drawing upon the combined assets of man and computer, Stedman's captures the total spectrum of terminology relevant to the life sciences. Each definition has been reviewed by as

many as five medical specialists to ensure proper coverage for subjects in overlapping fields.

Late developments in medical research have provided more than half of the 28,000 new or revised entries. Many of these terms are so current that they were still being entered as the main vocabulary was

prepared for press.

Make it your practice to use Stedman's. We've made perfecting it part of ours.

April 1976, 90,257 entries, 358 illustrations with 31 color plates, 1678 pages, \$26.50

Transplantation is the journal that uses today's research to bring tomorrow into better focus

Researchers and clinicians who need to know what's going on in immunology have long looked to *Transplantation* to find out. In its pages can be found the vitally pertinent information you want as you look for answers to the critical problems of rejection, tissue matching, immunization, and infection.

Hematology, endocrinology, genetics, and embryology are just a few of the specialties in *Transplantation's* cross-disciplinary coverage. Each issue contains formal in-depth papers, as well as brief reports on research from around the world.

As a subscriber to *Transplantation* you can expect to find only the latest information; you will know you are getting the best news first.
