Elsevier North-Holland proudly announces:

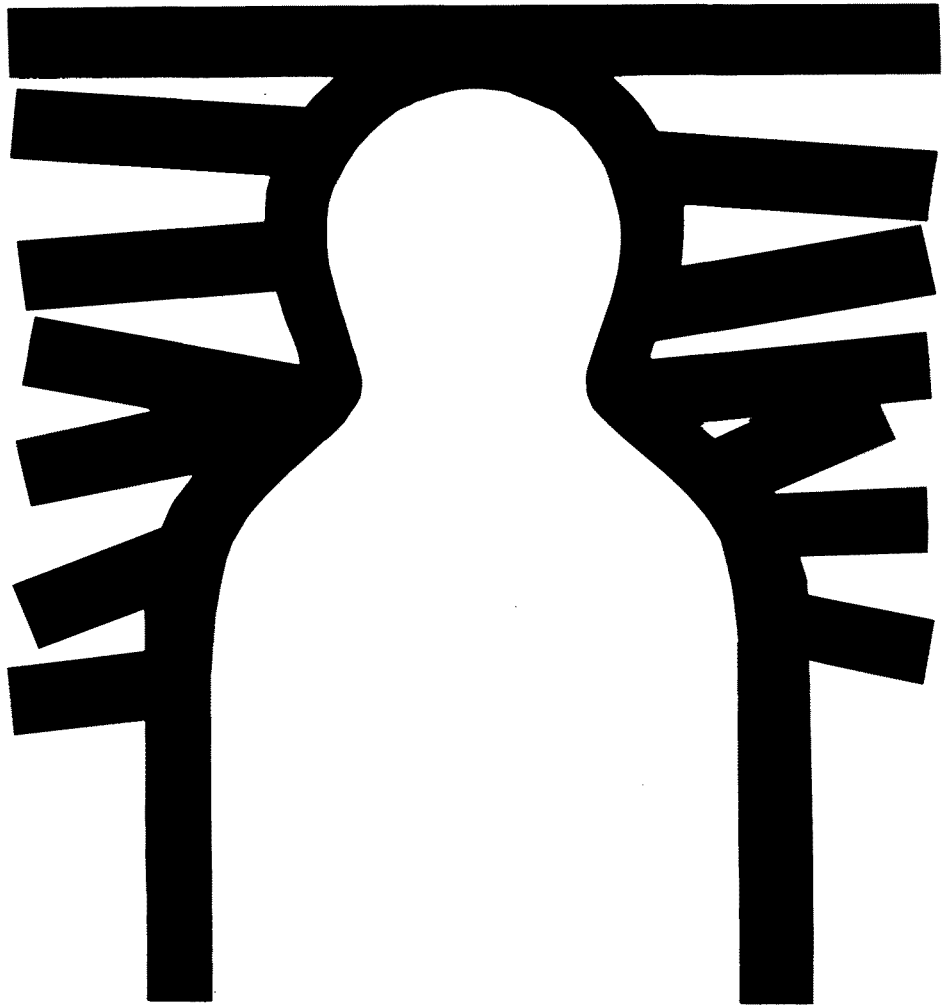

IMMUNOPHARMACOLOGY

An international journal
combining the fields of immunology and pharmacology.

Editor-in-Chief: **Dr. J. R. Battisto**, *Department of Immunology, Cleveland Clinic Foundation.*

Combining the fields of immunology and pharmacology, this journal will provide a medium for the publication of full-length articles and short communications in the following areas:

- The action of hormones and their mediators; e.g., cyclic nucleotides, prostaglandins in the regulation of the function of cells participating in immune responses.
- Hormones and cell factors endogenous to the immune system that are bioregulatory for lymphocyte and macrophage maturation, differentiation and replication.
- Cellular components that assist in regulating the functioning of cells synthesizing antibodies, cells mediating cellular killing and cells controlling immunological unresponsiveness.
- Mediators of immediate and delayed-type hypersensitivities.
- Pharmacological substances used as probes into molecular and cellular events involved in immunological responses.
- Items released through immunological and closely related pathways that are pharmacologically active at non-immunological levels.
- Factors useful for prevention, prediction and diagnosis of clinical entities, such as carcinomas, autoimmune diseases and immunological deficiencies.
- Viral and gene products operative in immunopathology.

1978 Subscription Information:

Volume 1 (4 issues) \$50.00 (Subscribers outside the USA and Canada add \$3.00 per volume for postage and handling).

ELSEVIER NORTH-HOLLAND ^{INC.}

52 VANDERBILT AVENUE NEW YORK, NEW YORK 10017

The stain in the main goes neatly on the plane...

with Bacto - Gram Stain Set.

Stains come in 250 ml. plastic bottles, ready to use. The special snorkel-top plastic cap supplied with each bottle puts the stain right where you want it, on the slide, not on hands or lab coat. The base of the set serves as a rack for the stain bottles. When a bottle is empty, simply discard and replace it from the handy economical 250 ml. 6-pack. The replacement eliminates accidental spillage while pouring from one bottle to another.

No time-consuming and messy dilution or preparation necessary. No weighing, filtering, or costly waste of material. Stains will not precipitate. All reagents are carefully standardized; Difco quality assures consistent, reproducible, accurate results every time. End messy stains in your laboratory. Write for literature 3328. P.O. Box 1058A, Detroit, Michigan 48232.

The set includes solutions for the complete procedure:

- Bacto - Gram Crystal Violet
- Bacto - Gram Iodine
- Bacto - Gram Decolorizer
- Bacto - Gram Safranin.
