BEGINNING...**

Metrizamide^{*}?

For Density Gradient Centrifugation. Most useful in the fractionation of nucleic acids, nucleoproteins, subcellular particles, organelles as well as cells and viruses.

Metrizamide is inert and forms solutions which, while much denser than can be obtained with sucrose, have relatively low viscosity and osmolarity. It is a non-ionic compound and non-toxic to cells.

Metrizamide A Grade
Analytical Grade
AN6300 50 gm \$80.00

Metrizamide C Grade
Centrifugation Grade
AN6400 50 gm \$57.50

*A patented product of Nyegaard & Co.

THE JOURNAL OF IMMUNOLOGY®

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to:

Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The *original and two (2) copies* of the manuscript, including references, legends, figures and illustrations must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least $\frac{3}{16}$ -inch or 5-mm spacing from the bottom of one line to the top of a capital of a succeeding line) on one side of $8\frac{1}{2}$ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. *The format of The Journal must be followed by typing the text and the list of references.* References will be numbered as they appear in the text and will be listed in the format:

1. Kindt, T. J., and W. J. Mandy. 1972. Recombination of genes coding for constant and variable regions of immunoglobulin heavy chains. *J. Immunol.* 108: 1110.

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references *must be typed on separate pages*. If abbreviations are to be used in the paper, the abbreviations and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

List all components of culture medium used in experiments so that sufficient data to reproduce reported re-

sults are available. This information may be supplied in the Abbreviations footnote, in a table listing all components, by referring to a published article containing the information, or by identifying the commercial source which supplies the specific medium if components are listed by the supplier.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material *must be on glossy paper (in triplicate)*; they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to \$100.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication. Estimates for color photomicrographs are also available.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

Letters to the Editor. Letters, which will be printed at the Editor's discretion, are responses to articles that have been published in *The Journal of Immunology* and should relate to scientific matters.

Opinion. This is an invited brief summary and commentary of a controversial subject of broad interest to immunologists.

Workshops. The *Journal of Immunology* will publish abstracts of workshops that have been refereed by program committees of the workshops. These will be accepted if each abstract is prepared for photocopy, i.e., typed single spaced on a separate page. Charges will be the full cost of each printed page.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged \$30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of \$30.00 per published page. Under exceptional circumstances, page charges will be waived if deemed appropriate by an adjudicating member of the Editorial Board.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.

THE JOURNAL OF IMMUNOLOGY®

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916 to 1925, and in 1928 Volumes I-X inclusive, and Vol. XV published bi-monthly.)

Annual Subscription Rates—U.S.A. AND POSSESSIONS: personal, \$80.00; institutional, \$100.00; single copy, \$9.00. FOREIGN: personal, \$90.00; institutional, \$110.00; single copy, \$10.00. Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations. A special rate of \$27.00 (\$37.00 foreign) is available to Students and Post-Doctoral Fellows. Certification forms may be obtained from the office of the American Association of Immunologists in Bethesda. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer. Dr. Henry Metzger, American Association of Immunologists, 9650 Rockville Pike, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Microfilm. For availability, inquire of The Williams & Wilkins Company.

Reprints of individual articles are available *only* from authors.

BALTIMORE, MARYLAND 21202 U. S. A.

Now you can benefit from the immunologic advances of international authorities in your field..

This three-volume set will assist you in everyday practice:

3rd edition

HANDBOOK OF EXPERIMENTAL IMMUNOLOGY

Edited by D. M. Weir, M.D.

1,100 pages, 480 illustrations in three volumes. Price, \$117.75.

This important work offers comprehensive coverage on a wide range of techniques available to the experimental immunologist, contributed by experts in each field. This new edition has been updated on the latest standards and contains expanded sections on measurement of antibody affinity, lymphocyte separation and characterization, and new appendices on biometrics and mouse breeding techniques. The book is designed as a handbook and, for the convenience of those who are primarily concerned with only one or two of the subjects, it is also available as three separate paperback volumes, each of which contains a full list of contents and a comprehensive index to the complete work.

Volume I. IMMUNOCHEMISTRY. 534 pages, 275 illustrations.

CONTENTS — Antigens * Complement * Immunoglobulins: purification and characterization * Immunogenetics * Antigen-antibody interactions: primary interaction * Methods for the study of the affinity and kinetics of antigen-antibody reaction * Secondary interaction

Volume II. CELLULAR IMMUNOLOGY. 350 pages, 140 illustrations.

CONTENTS — The violation and labelling of lymphocytes * Separation of lymphocyte subpopulations * Lymphocyte response to activators * Measurement of lymphokines * Assays for antibody-producing cells * Assay methods for antigen-mediated cell cooperation * Measurement of graft versus host activity * Phagocytes in vitro * In vitro determination of phagocytosis and intracellular killing by polymorphonuclear and mononuclear phagocytes * Assays for macrophage activation and secreting products * In vitro technique for the synthesis of immunoglobulins * Assays for cytotoxic and haemagglutinating antibodies against histocompatibility tests * In vitro cytotoxic tests * Immunologic techniques for the identification of antigens or antibodies by electron microscopy * Histochemistry in experimental immunology

Volume III. APPLICATION OF IMMUNOLOGICAL METHODS. 348 pages, 92 illustrations.

CONTENTS — Immunological methods in microbiology, virology, mycology, helminthology * Demonstration of antibodies to protozoa * Notes on problems associated with in vitro sensitization and antigen-antibody reactions * Techniques for the study of assay or reagins in allergic subjects * Assays of mediators in hypersensitivity reactions * Tests of immune function * APPENDICES

A New Book. SPERMATOOZOA, ANTIBODIES AND INFERTILITY.

Edited by Jack Cohen, D.Sc., F.I.Biol. and W. F. Hendry, Ch.M., F.R.C.S. This unique volume is composed of thoroughly edited papers from a symposium attended by physicians, biologists, and basic scientists. In it, leaders in the field discuss numerous significant aspects of infertility, including recent advances in the diagnosis and treatment of the problem. Since several of the papers were written from the scientist's point of view, you'll gain insight into the problem's underlying principles. Find out what your British colleagues are learning — and doing — about infertility. 1979. 288 pp., 12 illus. Price, \$27.50.

New 2nd Edition. **NASAL ALLERGY.** By Niels Mygind, M.D. Allergic diseases of the nose and paranasal sinuses are among the most common presented in otorhinolaryngology, allergy and respiratory medicine, although no recent book has been devoted exclusively to the subject. This second edition provides comprehensive discussions on the ultrastructure, immunology, disease and therapy as it provides a guide to the practical management of these disorders. June, 1979. Approx. 360 pp., 105 illus. About \$47.50.

A New Book. **IMMUNOLOGY AT A GLANCE.** By John H. L. Playfair, M.B., B.Chir., Ph.D. December, 1979. Approx. 160 pp., 35 illus. About \$11.50.
