**Inhibition of T Cell Responses to Alloantigens and Polyclonal Mitogens by Ly-5 Antisera**

**Suppressor T Cell Recognition of Major and Minor Histocompatibility Alloantigens: Selected Suppression of MHC-Directed Responses by Minor Alloantigen T**

**Recognition of H2-Kb Mutant Target Cells by Moloney Virus-Specific Cytotoxic T Lymphocytes from bm13 (H-2Db-Mutant) Mice. I. Full Recognition of K*bm13* by Kb-Restricted CTL**

**Recognition of H-2Kb Mutant Target Cells by Moloney Virus-Specific Cytotoxic T Lymphocytes from bm13 (H-2Db-Mutant) Mice. II. Relationship of K*bm3* and K*bm11* in Restriction Specificities and Allodeterminants**

**Induction of Minor Alloantigen-Specific T Cell Subsets In Vivo: Recognition of Processed Antigen by Helper but not by Cytotoxic T Cell Precursors**

**Target Cell Susceptibility to Immune Lysis and Expression of MHC Antigens Are Independent of Position in the Cell Cycle**

**Early Loss of Precursors of CTL and IL-2-Producing Cells in the Development of Neonatal Tolerance to Alloantigens**

**Lack of Adenosine Deaminase Activity in Cultured Murine Cytotoxic T Lymphocytes**

**Lyt-2" T Cell-Independent Functions of Lyt-2" Cells Stimulated with Antigen or Concanavalin A**

**Murine IgA Binding Factors Produced by FcaR (+) T Cells: Role of FCyR (+) Cells for the Induction of FcaR and Formation of IgA-Binding Factor in Con A-Activated Cells**

**Evidence of a Dynamic Role of the Target Cell Membrane during the Early Stages of the Natural Killer Cell Lethal Hit**

**Activation of B Cells by Autoreactive T Cells: Cloned Autoreactive T Cells Activate B Cells by Two Distinct Pathways**

**Pre-B Cells in Mouse Bone Marrow: In Vitro Maturation of Peanut Agglutinin Binding B Lymphocyte Precursors Separated from Bone Marrow by Fluorescence-Activated Cell Sorting**

**In Vitro Administration of Anti-I-A Antibody Induces the Internalization of B Cell Surface I-A and I-E without Affecting the Expression of Surface Immunoglobulin**
