

The Power to Question

Introducing the New
2008 Research
Antibody Catalog
from Santa Cruz Biotechnology, Inc.

> **#1** **Leader in Innovation
and Quality**

Leading (#1) Worldwide Source of:

- > monoclonal and polyclonal antibodies
- > support data (gels and stains)
- > siRNA products
- > product citations by research scientists
- > secondary antibodies and support products

Over 33,500 primary antibodies (monoclonal and polyclonal) and 29,000 siRNA products.

*Website updated daily with new antibodies,
new siRNAs, product citations and support

Rely on FIRSTS from eBioscience ...

Clean up your IP/WB with TrueBlot™

Western Blot Data with TrueBlot™

No Contaminating Ig Bands!

Available for mouse, rabbit, goat & sheep IgG!

Western Blot Data with TrueBlot™

Be the leader in your field. TrueBlot™ is the only Western blotting reagent that is specifically designed to remove contaminating Ig bands from your Western blots. TrueBlot™ is available in mouse, rabbit, goat & sheep IgG.

eBioscience
The most comprehensive selection of reagents for cell analysis.

TrueBlot -
First in Innovation for IP/WB Detection

Authentic Cytokines

IL-23
Linkerless & Tagless

Real Science Calls

Authentic Cytokines, Linkerless & Tagless

IL-23 is a member of the IL-6 family of cytokines and is produced by dendritic cells and Th17 cells. It is a key regulator of Th17 cell differentiation and is involved in the pathogenesis of autoimmune diseases such as psoriasis and Crohn's disease.

Authentic Cytokines, Linkerless & Tagless

IL-23 is a member of the IL-6 family of cytokines and is produced by dendritic cells and Th17 cells. It is a key regulator of Th17 cell differentiation and is involved in the pathogenesis of autoimmune diseases such as psoriasis and Crohn's disease.

The most comprehensive selection of reagents for cell analysis.

Another FIRST from eBioscience in the field of Th17 autoimmune research

eBioscience was the first to introduce analysis of human IL-17A, IL-17F and mouse IL-17 by flow cytometry and continue to be the industry leader in reagents for the Th17 and Th17 related field, including recombinant proteins, IL-17A, IL-17F, IL-17R, and our extensive panel of Th17-related antibodies.

Explore New Paradigms in T_{reg} and Dendritic Cell Biology

IMGENEX offers a broad portfolio of highly characterized research tools to explore emerging paradigms in dendritic and regulatory T cell research. These reagents have been validated for flow cytometry, IHC (frozen and paraffin embedded), receptor internalization & tracking studies, *in vivo* depletion, and are available as multiple conjugates. To learn more about our functionally active recombinant proteins and antibodies, visit us at www.imgenex.com

Dendritic Cell Reagents

- pDC/IPC (120G8)
- Langerin/CD207 (310F7 & 929F3)
- BDCA-2/CD303 (124B3)
- IL3-R α /CD123 (107D2)
- Neuropilin-1/BDCA-4 (211H6)
- ASGPR/CD301 (125A10)
- DC-SIGN/CD209 (108C7)
- DCIR (111F8)
- DC-LAMP (1010E1 & 104G4)
- TLRs

Regulatory T cell Reagents

- FOXP3 Δ 2 [exon2 deleted] (16J4G6) **New!**
- FOXP3 (3G3)
- GPR83
- Folate Receptor/FR (TH6 & 12A5)
- CD127/IL7R (R34-34)
- iNKT (6B11)
- GITR (DTA-1)
- CD4 (GK1.5 & RPA-T4)
- CD25 (PC61 & 7G7B6)

Demonstration *in vitro* of the potency of Fc-OX40L in comparison to an agonist antibody OX86, with anti-CD3 alone serving as a negative control for co-stimulation.

Functionally Active Recombinant Proteins

- OX40L/TNFSF4
- GITRL
- CD137L
- B7.1

convenient sizes; please inquire for bulk pricing

Receive an iPod touch on all qualifying orders over \$2300. Limited time offer, some restrictions apply, visit imgenex.com/ipodtouch for details.

Your Source for Innate Immunity Reagents

Myeloperoxidase (MPO)

MPO ELISA assays for plasma and tissue neutrophil infiltration

- For human, mouse and rat inflammation studies
- A reliable and fast technique with an easy protocol.
- Quantifies neutrophil infiltration in tissues.
- Alternative to cumbersome, unreliable enzymatic assays for MPO.
- No time-consuming histology and microscopic cell counting.
- Quantifies MPO in plasma and cell culture medium.
- Large concentration range:
Human MPO ELISA range 0.4 - 100 ng/ml
Mouse MPO ELISA range 1.02 - 250 ng/ml
Rat MPO ELISA range 1.0 - 250 ng/ml

More Hbt ELISAs & antibodies

NGAL	BPI	Elafin/SKALP
Calprotectin	LBP	Elastase
LL-37	HNP 1-3	SLPI
SLPI	Lactoferrin	

Sign up on CellSciences.com today to receive *HycultScope* newsletter for news on the latest Hbt products available. The current issue, *Kidney Diseases*, features:

- Complement markers of renal diseases
- FABPs as biomarkers in renal disease
- Role of complement in ANCA related necrotizing small vessel vasculitis
- NGAL, sMAdCam-1, L-Ficolin ELISA

Cell Sciences is proud to be the distributor of Hbt products in the USA, Canada and South America. For inquiries outside this area visit Hbt's website at www.hbt.nl. The new 2008 /2009 catalog of Hbt products is now available. Call for your copy today!
