## FACULTY POSITION

### Cancer Immunology and Immunotherapy Research

The University of Virginia is seeking applications for new faculty, open rank, for expansion of its research program in Cancer Immunology and Immunotherapy. The Immunology and Immunotherapy Program of the Cancer Center and the Human Immune Therapy Center at the University of Virginia have strengths in cancer antigen identification, vaccine development, and clinical trials. We are recruiting a laboratory scientist or clinician scientist with an exceptional track record of accomplishment whose interests define new research directions that are synergistic with the program's existing strengths. The home department designation will be determined on an individual basis.

The University is expanding the Cancer Immunology and Immunotherapy Program by dedicating a full floor of a new building that also will house expanded programs in Immunology and Inflammation and Women's Oncology. This recruitment is part of a significant growth of oncology programs, including a new clinical Cancer Center building. Charlottesville, VA, is an extraordinarily attractive community with excellent schools, cultural amenities and access to extensive recreational facilities and natural areas.

**Required:** M.D. and/or Ph.D. degree with exceptional track record of accomplishment as evidenced by strong publication record, awards, invited talks, etc. **Preferred:** A strong interest in translational and clinical trials research and existing independent peer reviewed funding.

To apply, visit: <https://jobs.virginia.edu> and search on **Posting Number 0603133**. Complete a Candidate Profile online and attach a CV, cover letter, and contact information for three references. The position will remain open to applicants until filled.
