On the cover: DNA nanoparticles protect mice from immune-mediated arthritis. Loss of cartilage proteoglycans in limb joints caused by Ag-induced arthritis was prevented by cotreating mice with DNA nanoparticles. Proteoglycans were visualized by Safranin-O staining (red) with fast green and iron hematoxylin counterstain (original magnification $\times 200$). Huang, L., H. P. Lemos, L. Li, M. Li, P. R.
