On the cover: OVA-specific transgenic CD4⁺ T cells labeled with CFSE were injected into mice prior to injection of clodronate liposomes, followed by immunization with an OVA-polysaccharide conjugate mixed with adjuvant. At day 3, flow cytometric analysis of CFSE dilution demonstrated a higher T cell proliferative index relative to the control group. Swagata K., J. Colino, and C. M. Snapper. 2016. Distinct cellular pathways for induction of CD4⁺ T cell-dependent antibody responses to antigen expressed by intact bacteria versus isolated soluble antigen. *J. Immunol.* 196: 4204–4213.
