Postdoctoral Opportunities in Allergy and Immunology at Northwestern University

The Northwestern University Allergy-Immunology Research (NUAIR) program is a NIH T32 funded training grant for MD, PhD or MD/PhD postdoctoral fellows in translational research in Allergy-Immunology. Successful applicants will join their choice of over two dozen laboratories in the program. Projects should be translational, i.e. involving human subjects or human derived materials, and the program has many very strong, NIH funded mentors. Some of the mentors in NUAIR are listed at the NUAIR website: http://www.medicine.northwestern.edu/divisions/allergy-immunology/research/.

NUAIR mentors are at the forefront of fields relevant to allergic diseases. Topics include pathogenesis, genomics, genetics, epidemiology, immunology and pharmacology of allergic and inflammatory diseases. Diseases of interest include asthma, food allergy, chronic rhinosinusitis, respiratory virus infections, hypereosinophilic disorders and others. A number of courses are afforded to NUAIR fellows.

The positions include one-year appointments, with renewal for a second year possible. Positions are open immediately, and interested candidates are encouraged to apply. Applicants must be U.S. Citizens or Permanent Residents to be eligible for appointment. Interested applicants should submit a cover letter, curriculum vitae, representative publications and papers, and the names of three references, along with a statement of research interests, to Robert Schleimer, Chief, Allergy-Immunology at rschleimer@northwestern.edu.

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.

JOB ANNOUNCEMENT
ASSISTANT/ASSOCIATE PROFESSOR POSITION IN THE DEPARTMENT OF PEDIATRICS AND ADOLESCENT MEDICINE
American University of Beirut,
Faculty of Medicine and Medical Center

The Department of Pediatrics and Adolescent Medicine at the American University of Beirut Medical Center is seeking a full-time specialist in Pediatric Allergy-Immunology at the level of assistant or associate professor. Candidate must be certified by the American Subspecialty Board or equivalent. His/her responsibilities will include inpatient and outpatient care, resident supervision and teaching of medical students and more as deemed appropriate by the Division Head. Significant clinical and basic research experience in primary immunodeficiencies is required and this should be supported by demonstration of publications in the field. The candidate is expected to participate in the research activities of the division and eventually perform independent research. The successful candidate will be appointed at the appropriate academic rank and track.

Applicants should submit electronically their curriculum vitae, names and addresses of four references, a summary of their accomplishments in the areas of clinical scholarly activities, teaching and research; and future plans. All requested documents should be forwarded to the following e-mail address: abboudm@aub.edu.lb No later than February 15, 2017 to:
Miguel R. Abboud, MD
Professor and Chairman
Department of Pediatrics and Adolescent Medicine
American University of Beirut
P.O. Box 11-0236 - Riad El Solh
1107 2020 Beirut, Lebanon
AUB is an affirmative action institution and an equal opportunity employer.

ONE RESEARCHER, ONE SORTER, ONE CELL, MANY DISCOVERIES. BD is dedicated to developing easy-to-use cell sorting technologies that simplify accurate and reliable flow cytometry. The BD FACSMelody™ cell sorter introduces a powerful combination of high performance, reproducible results and automated ease of use from a brand whose integrated flow cytometry portfolio and rigorous standards you can trust. BD FACSMelody is an affordable cell sorter that requires minimal training making it an ideal solution to advance your research. Its software guides the operator through every step, with a system sort readiness of less than 17 minutes for optimal timeliness. Designed to improve efficiency and throughput, it comes with the full suite of BD service and support to help you maximize your investment. Learn more about the one cell sorter that is easy to learn, to use and to maintain. Discover the difference one company can make.
