On the cover: An IgV₆-C₂ molecule found in invertebrate amphioxus (AmplgV₆-C₂) reveals critical structural features characteristic of vertebrate adaptive immune receptors. Immunogold electron microscopy shows that IgV₆-C₂ is localized in secretory granules, cell protrusions, and cilia of intestine, which are considered to be major immune response sites. Chen, R., L. Zhang, J. Qi, N. Zhang, L. Zhang, S. Yao, Y. Wu, B. Jiang, Z. Wang, H. Yuan, Q. Zhang, and C. Xia. 2018. Discovery and analysis of invertebrate IgV₆-C₂ structure from amphioxus provides insight into the evolution of the Ig superfamily.

The Journal of Immunology (ISSN 0022-1767) is published twice each month by The American Association of Immunologists, Inc., 1451 Rockville Pike, Suite 650, Rockville, MD 20852, Phone: 301-634-7197, Fax: 301-634-7829. Subscription terms: New subscriptions and renewals begin January 1 and expire one year later (see http://www.jimmunol.org/subscription for prices and details). A special rate is available to members of The American Association of Immunologists, Inc. (see http://www.aai.org/membership). The American Association of Immunologists, Inc., is not responsible for undeliverable issues. Replacement issues can be obtained, if available, at the regular price of single issues (see http://www.jimmunol.org/Subscription/Claims). Reprints of individual articles are available only from authors. Periodicals postage paid at Rockville, MD 20852, and at additional mailing offices. Country of origin U.S.A. Printed on acid-free recyclable paper. Postmaster: Send address changes 60 days in advance to The Journal of Immunology, Subscription Department, 1451 Rockville Pike, Suite 650, Rockville, MD 20852.
