The American Association of Immunologists (AAI) proudly announces the 2021 class of Distinguished Fellows of AAI.

This program recognizes members for distinguished careers and outstanding scientific contributions as well as their service to AAI and the immunology community. It honors active, long-term members (25 or more years) who have demonstrated one or more of the following: excellence in research accomplishment in the field of immunology; exceptional leadership to the immunology community in academia, foundations, nonprofits, industry, or government at a national or international level; notable distinction as an educator. Election as a Distinguished Fellow occurs annually and is among the highest honors bestowed by AAI. Distinguished Fellows bear the designation “DFAAI.”

THE AMERICAN ASSOCIATION OF IMMUNOLOGISTS

The American Association of Immunologists annually honors the research achievements and professional promise of over 1,000 scientists through fellowships, career awards, and travel grants.

AAI Fellowships provide Regular and Trainee members with career advancement opportunities through programs supporting trainees’ salaries and public policy education.

AAI Career Awards honor individuals for outstanding research and career achievements. AAI members are eligible for these career awards, which are among the leading professional honors presented annually to immunologists.

AAI Travel Awards and Grants recognize the professional promise of early- and mid-career investigators by assisting them with travel to the AAI annual meeting and travel to learn techniques.

In its commitment to the cultivation of career opportunities for promising young scientists, AAI also provides support for over 100 travel awards at selected other immunology conferences.

Director: Wayne M. Yokoyama, M.D., DFAAI
Washington University School of Medicine

Don’t miss the premier course in immunology for research scientists!
This intensive online course is directed toward advanced trainees and scientists who wish to expand or update their understanding of the field. World-renowned immunologists will present recent advances in the biology of the immune system and address its role in health and disease. This is not an introductory course; attendees will need to have a firm understanding of the basic principles of immunology and laboratory techniques.
