On the cover: This special issue of *The Journal of Immunology*, entitled “Celebrating Diversity in Immunology,” highlights an outstanding cadre of immunologists with diverse backgrounds who have been recognized as current or future thought leaders given their considerable scientific accomplishments. Unlike our previous annual review collections, which focused on a single area within immunology, this year we wanted to celebrate diversity in immunology with a collection of reviews that represent a broad spectrum of science. The cover was designed to represent our commitment to scientific and cultural diversity.
