

The Principles of Bacteriology and Immunity

By W. W. C. TOPLEY, Professor of Bacteriology and Immunology, University of London
and G. S. WILSON, Professor of Bacteriology as Applied to Hygiene, University of London

*New Second Revised and Enlarged Edition
Now Ready in One 1660 page Volume*

TOPLEY AND WILSON'S great two-volume work is now in one volume at \$12.00 (formerly \$15.00)—in England 50 s—Most up to date and authoritative presentation of these subjects in existence.

Part I. GENERAL BACTERIOLOGY

Part II. SYSTEMATIC BACTERIOLOGY

Part III. INFECTION AND RESISTANCE

Part IV. APPLICATIONS TO MEDICINE AND HYGIENE

More than a book—an entire bacteriological library systematically arranged for study and reference.

"A notable production. . . The material has been well-digested and is presented in an orderly and easily assimilable form, and in far greater detail than in any English or American text-book of reasonable size, with which we are acquainted. . . . The inquirer is rarely left in the air."
—*Lancet (London)*.

"Thorough, with complete references to medical literature. The history, causes, methods of infection, serology,

diagnosis, prevention, and treatment of infectious disorders is fully elucidated. A good index makes reference to any special subject simple."
—*Journal of the A. M. A.*

"The standard British reference volume on the subject. . . Comprehensive and authoritative . . . Has advantage over most other presentations in that it includes practical application."
—*Journal of Laboratory & Clinical Medicine*.

One volume. Buckram, 6¼ x 9½. 1660 pp. 36 pp. of Index. Bibliography with each chapter. 276 illustrations. 192 tables. Bergey nomenclature used. *Now \$12.00.*

ORIGINAL FRENCH MAKE CHAMBERLAND-PASTEUR FILTERS

IN OUR STOCK FOR IMMEDIATE SHIPMENT

FILTER CYLINDERS, Chamberland-Pasteur. Of porcelain, with porosity increasing in fineness from L₂ coarse to L₇ fine. These filters can be regenerated by incineration in an electric muffle furnace, with heating chamber 4¼×3×10 inches.

5110. **Filter Cylinder, Chamberland-Pasteur, "Bougie B,"** as above described, with glazed flange and nipple size of cylinder, 200×25 mm; porosity L₇. Suitable for pressure; fits No. 5118 Chamberland-Pasteur Pressure Filter Apparatus..... 1.50
Code Word..... *Flywt*
5111. **Ditto, "Bougie F,"** coarser, i.e. porosity L₆. Suitable for ordinary filtrations..... 1.50
Code Word..... *Flyte*

5111-C. **Filter Cylinders, Chamberland-Pasteur,** porosity L₂, as above described, without flange or nipple but glazed for some distance below the top. This filter is used for a variety of work as, for example, in the Martin Filter Apparatus and in the d'Herelle technique for the isolation of bacteriophage, etc. See F. d'Herelle, "The Bacteriophage and Its Behavior," (Baltimore, 1926), p. 22.

*10% discount on Chamberland-Pasteur Filter Cylinders
in lots of 12 of one size and porosity*

5118. **Filter Apparatus, Pressure, Chamberland-Pasteur,** for sera, vaccines, etc. Consisting of a pressure cylinder of heavy copper with brass mountings, of approximately 2 liters capacity and constructed to withstand pressures up to 500 lbs. With manometer, nickel plated copper mantle for the filter cylinder, pressure pump and necessary connections, mounted on angle iron support. A No. 5110 Filter Cylinder, B, is included with the outfit. An improved model, made in U. S. A..... 120.00
Code Word..... *Foddi*
5119. **Ditto,** but without hand pump; for connection to any other available source of pressure..... 87.50
Code Word..... *Fodzt*

Prices subject to change without notice.
