---

**THE EMPLOYMENT BUREAU OF THE Society of American Bacteriologists**

- For the benefit both of employers seeking to fill vacancies, and of applicants desiring a position in the field of bacteriology, the Society of American Bacteriologists maintains an Employment Bureau. There is no charge for registering with the Bureau, but applicants for positions agree to send the bureau a small per cent of their salary for the first three months, viz., 2% if the applicant is a member of the Society, and 5% if a non-member. Funds received in this manner are used to defray actual operating expenses of the bureau on a non-profit basis, and any excess sums are transferred to the Society for the support and enlargement of its publications, research fellowships, culture collection, and other activities.

- Positions filled through the bureau include those of

  - Research Bacteriologist
  - Teaching Bacteriologist
  - Medical Bacteriologist
  - Serologist
  - Agricultural Bacteriologist
  - Industrial Microbiologist
  - Laboratory Technician
  - Hospital Technician

- Under present conditions, causing frequent changes, the Bureau is exerting added effort to fill vacancies. All inquiries are given prompt and careful attention. Address communications to:

  **Dr. Frank H. Johnson, Director**
  Employment Bureau of the Society of American Bacteriologists
  PRINCETON, NEW JERSEY

**Before you study the next serologic report get acquainted with Kahn's Serology in Syphilis Control**

**Principles of Sensitivity and Specificity**

*Because the book*

- Shows how to evaluate the results of tests. (It does not discuss which test is better or poorer than the other, nor does it describe technique.)
- Gives you the reasons for "unexpected" reactions and tells what to do about them—whether multiple tests split specimens super-sensitive tests repeat examinations quantitative tests

are the answer to the problem before you.

**Enables you to utilize available tests to best advantage in the diagnosis and treatment of syphilis and in the control of the disease.**

CERTIFIED

POTASSIUM TELLURITE

NOW MADE IN U. S. A.

POTASSIUM TELLURITE, c.p., Certified. For use in preparing tellurite-cystine-blood agar according to the formula of McGuigan and Frobisher for the isolation of C. diphtheriae. Each lot is tested and furnished with specific directions for use. For example, Lot No. 19 now in our stock is furnished with the following directions for use:

**TECHNOLOGICAL SERVICE**

**DIRECTIONS FOR USE**

for

POTASSIUM TELLURITE

Lot No. 19

A sample of Lot No. 19 has been tested and, if used with the precautions published,* should yield satisfactory isolations of C. diphtheriae with medium of the following composition:

Infusion Agar, pH 7.4-7.6, 45° C. ................. 1000 ml
Sheep blood (citrated or defibrinated) ............. 50 ml
Cystine, H.P., Pfannstiel, dry ...................... 50 mg
Potassium Tellurite, Coleman & Bell, Lot No. 19
(0.5% sterile, aqueous solution) .................. 150 ml

As this tellurite is very dehydrated it should, in humid weather, be weighed quickly so as to reduce error due to absorption of moisture. Open the bottle only when necessary.
