The Properdin System and Immunity. XIV. The Injection of Human Properdin into Rabbits and the Production of Antibodies to Properdin. CARL F. HINZ, JR., RALPH J. WEDGWOOD, EARL W. TODD AND LOUIS PILLEMER ........................................... 547

Studies on Organ Specificity. IX. Biophysical and Immunochemical Studies on Human Thyroid Autoantibody. SIDNEY SHULMAN AND ERNEST WITEBSKY .................................................. 550

Studies on Organ Specificity. X. The Serologic Specificity of Pancreas Extracts. ERNEST WITEBSKY, NOEL R. ROSE AND HYMAN NADEL ................................................................ 568

Studies on Organ Specificity. XI. Isoantigens of Rabbit Pancreas. NOEL R. ROSE, RICHARD S. METZGAR AND ERNEST WITEBSKY ............................................................................. 575

A Possible Correlation between the Minimum Sensitizing Dose of Antibody in Passive Anaphylaxis and the Molecular Weight of the Antigen. JACOB J. PRUZANSKY, SAMUEL M. FEINBERG, MILDRED HARRIS AND NORMA WOJCIEK .............................................................................. 588

Antigen-Antibody Reactions in Agar V Precipitate Density Studies Using the Oudin Technique. ALONZA R. HAYDEN AND ELMER L. BECKER ........................................................................... 591

Serologic Studies of the Neuraminidases of Vibrio cholerae, Diplococcus pneumoniae and Influenza Virus. MORTON A. MADOFF, EDWIN H. EYLER AND LOUIS WEINSTEN ................................................................................................. 603

The Use of Antigen-Antibody Specific Precipitates in Skin Testing for Delayed Hypersensitivity. SIDNEY LESKOWITZ ........................................................................................................... 614

Behavior of Intravenously Administered IH Diphtheria Toxoid in the Guinea Pig. S. P. MASOUREDIS .......................................................................................................................... 623

Studies on Actively Acquired Resistance to Experimental Cryptococcosis in Mice. IRVING ABRAMS AND THOMAS G. GILLERAN ..................................................................................... 629

Studies of Blood Group Antibodies. III. Observations on the Physicochemical Properties of Isohemagglutinins and Isohemolysins. ARNOLD J. RAWSON AND NEVA M. ABELSON ................................................................................................. 636

Studies of Blood Group Antibodies. IV. Physicochemical Differences between Isoanti-A, B and Isoanti-A or Isoanti-B. ARNOLD J. RAWSON AND NEVA M. ABELSON ..................................................................... 640

Competition of Antigens. I. The Effect of a Secondary Response to One Antigen on the Primary Response to a Heterologous Antigen Administered at the Same Time. PETER ABRAMOFF ......................................................................................................................... 648
