**Wilson & Miles: TOPLEY AND WILSON'S  
PRINCIPLES OF BACTERIOLOGY AND  
IMMUNITY, 4th Edition**

"The publication of a new edition of Topley and Wilson is of international interest to bacteriologists, for no other textbook in the English language on the subject occupies so pre-eminent a position.

"In the preface the authors themselves say that parts of their text have now too many details for the undergraduate medical student. They have for that reason incorporated more detail and more references in order to ensure that the book is of greatest value to those for whom it was primarily intended—postgraduate students, research workers and university teachers."—*Canad. M. A. J.*

By G. S. WILSON, M.D., F.R.C.P., D.P.H., *Director of the Public Health Laboratory Service, England and Wales;*  
and A. A. MILES, C.B.E., M.A., M.D., F.R.C.P., *Professor of Experimental Pathology, University of London,*  
and *Director of the Lister Institute of Preventive Medicine, London.*

## THE JOURNAL OF IMMUNOLOGY

### *Information for Subscribers*

*Published monthly*, beginning January, 1929. (From 1916–1925, and in 1928 Volumes I–X, inclusive, and Vol. XV published bi-monthly.)

*The subscription price* is \$18.00 per year in U.S.A.; \$18.75 in Canada; \$19.50 elsewhere. Single copies, when available, are \$2.25 in U.S.A.; \$2.50 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Byron H. Waksman, Massachusetts General Hospital, Boston 14, Mass. All other subscriptions should be sent to the publishers.

*Change of address:* Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

*New subscriptions and renewals* are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

*Subscriptions should be renewed promptly:* To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

*Correspondence concerning all business matters* should be addressed to

to diagnosis . . .

## Davey: Blacklock and Southwell's GUIDE TO HUMAN PARASITOLOGY 6th ed.

Intended for the practitioner who from time to time must make a diagnosis in diseases caused by animal parasites. Particularly helpful for those whose laboratory facilities are limited. ". . . completely revised for the 1958 edition and very informative. The book has one hundred and nineteen illustrations, and some of them are most unusual. When general practitioners take a post-graduate course in human parasitology they usually become so overwhelmed by the abundance of new names and details that they fail to grasp the knowledge in sheer self defense. The reason for this book is to show the general practitioner in a rather unorthodox but, nevertheless, far more expressive manner what he should really know."—*Gen. Pract.*

**CONTENTS**—General considerations. The microscope. Examination of material. Parasitology. Group spirochaetacea. Protozoology. Class I. Rhizopoda. Class II. Mastigophora. Class III. Sporozoa. Class IV. Ciliata. Phylum platyhelminthes. Class I. Cestoidea. Examination of material. Order pseudophyllidea. Order cyclophyllidea. Class II. Trematoda. Order Prostomata. Superfamilies opisthorchoidea, fascioida, troglotrematoidea. Phylum nematohelminthes. Class nematoda. Superfamilies ascarioidea, oxyuroidea, rhabditoidea, trichinelloidea, strongyloidea. Superfamily filarioidea.

ANNOUNCING...  
NEW ROCKLAND  
LABORATORY PRIMATE DIET

new  
star  
shape

A "New Star" in Primate  
Nutrition...feeding economy...  
palatability...process and shape

Investigators agree that laboratory primates, especially during the process of their acclimation, exhibit their natural traits and characteristics in their eating habits and become suspicious, choosy and selective eaters. Every feeding, especially during this initial period, becomes a challenge for the investigator.

To meet this challenge and insure ready response at feeding time, Staley research has developed NEW ROCKLAND Laboratory

Primate Diet—a highly palatable, nutritionally complete formulation. No supplementation of fruits and vegetables as sources of Vitamin C is necessary when fed within the dating period indicated on the tag affixed to the bag.

Another extremely valuable advantage incorporated into this product is its shape. Best described as STAR SHAPE, its measurements between points are 2 inches—with a length of 1½ inches and a thickness of ¼ inch.

After considerable feed testing and research, the new star shape was selected over several other physical forms. The star shape and proportions of Rockland Laboratory Primate Diet not only provide the primates with greater biting surface, but also affect feeding economies as food will not fall through the cage floor.

Phone your Rockland Dealer today for trial sample and information, or write: A. E. Staley Mfg. Co., Rockland Diets, Decatur, Ill.

Other Rockland Diets include:

RAT DIET (complete) • DOG DIET • RAT DIET (D-Free) • GUINEA PIG DIET • MOUSE DIET • RABBIT DIET • MOUSE BREEDER DIET

Two books for the  
General Practitioner . . .

**Parish & Cannon: ANTISERA, TOXOIDS,  
VACCINES AND TUBERCULINS IN PRO-  
PHYLAXIS AND TREATMENT, 5th edition**

“This book was first published in 1948 in order ‘to present in convenient form the essential principles of immunology and their practical application in human medicine.’ In successive editions it has served not only as a guide to inoculations . . . but also as a work of reference for practitioners and senior students who have insufficient time to consult larger works. Its primary appeal is to the general physician or public health worker rather than to the specialist. . . . “Revision has been drastic throughout. . . . Both authors were privileged to serve on the editorial committee responsible for the *Proceedings of the Wellcome Symposium on ‘Immunization in Childhood’* held in London last year. (See below.) Perhaps this new edition should be read in conjunction with these *Proceedings*, which amplify it and serve to show why it behooves children (and adults) to have the full programme of injections advised by the clinic or family doctor.”—*Preface*

By H. J. PARISH, *Clinical Research Director, Wellcome Foundation, Ltd.; formerly Bacteriologist, Wellcome Research Laboratories;* and D. A. CANNON, *Medical Adviser, Wellcome Research Laboratories, Beckenham, Kent; formerly Chief Pathologist, Federal Medical Department, Nigeria*

● an entirely new concept—simple as 1-2-3

# Complete Tissue Cultures

at  
7.4 pH

ready to use  
in seconds

**1** CulturSTAT Reagents are supplied in two 100 ml bottles, with a sterile, disposable Vacutainer needle. Bottle 1 contains desiccated perishable reagents of the culture media. Bottle 2 contains a balanced salt solution. CulturSTAT Reagents have long shelf life at normal room temperatures.

**2** To restore the desiccated material, insert the short end of the Vacutainer needle through the seal of Bottle 2 and the long end through the seal of Bottle 1. Vacuum automatically transfers the salt solution aseptically in seconds.

**3** Withdraw the needle and the complete, sterile tissue culture, at 7.4 pH  $\pm$  0.2, is ready for use in seconds.

## CulturSTAT

This product, originated by Cappel Laboratories, eliminates entirely the time and effort required to obtain and pipette individual ingredients of a tissue culture medium and to adjust to the proper pH. The possibility of pipetting errors is eliminated and uniformity is assured by standardization.

Ask your dealer for CulturSTAT Tissue Culture Reagents today.

*THIS NEW PLANT ASSURES YOU*

*precision*

*MANUFACTURING*

Now, from a special new plant in Peoria, Illinois, Allied Mills gives you the ultimate in Laboratory Animal Diets. This plant was built especially for precision manufacturing of Wayne Laboratory Animal Diets. There is no chance of contamination from other milling operations, something that is extremely important to long-term scientific projects. And quality control procedures are more efficient in this highly specialized plant. When investigators and commercial breeders specify Wayne Animal Laboratory Diets, they know that the formulation and manufacturing will be uniform from batch to batch . . . from year to year.

**These are the quality tested Wayne Laboratory Animal Diets:**  
**Wayne Lab-Blox (for mice, rats, hamsters). Wayne Mouse Breeder Blox.**  
**Wayne Guinea Pig Diet. Wayne Rabbit Ration. Wayne Dog Food.**
