

THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original should be sent to

DR. JOHN Y. SUGG
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York 21, N. Y.

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of \$1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip, is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice for reprints will also include charges for illustrations, excess pages and tabular matter, if any.

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12", they must be accompanied by glossy photographs within this size.

IMMUNOLOGY

Official Journal of the BRITISH SOCIETY FOR IMMUNOLOGY

Editor: J. R. MARRACK

VOL. V, NO. 3

CONTENTS

MAY 1962

The effect of pre- and neo-natally injected diphtheria toxoid on the homologous responsiveness of young guinea pigs—a preliminary report. DAVID W. WEISS AND ORA MAIN

Properdin levels in the sera of rabbits exposed to a silica dust cloud. GWEN M. MACNAB AND IAN WEBSTER

A survey of the effect of metabolic antagonists on the synthesis of antibody in an *in vitro* system. R. W. DUTTON AND JENNIFER D. PEARCE

The genetic basis for the graft-against-host reaction between inbred lines of fowls. Differences between the Reaseheath C and I inbred lines. P. JAFFE AND L. N. PAYNE

Tolerance of erythrocytes in poultry: induction and specificity. N. A. MITCHISON

Tolerance of erythrocytes in poultry: loss and abolition. N. A. MITCHISON

Effect of neonatal injections of protein on the immune response to protein-hapten complexes. STEPHEN V. BOYDEN AND ERNST SORKIN

Specific inhibition of antibody production. II. Paralysis induced in adult mice by small quantities of protein antigen. D. W. DRESSER

Fluorescent protein tracer studies in allergic reactions. II. The fate of fluorescent antigen in reversed Arthus reactions and passive cutaneous anaphylaxis in guinea-pig skin. C. VAN DEN BERG, J. OORT AND TH. G. VAN RIJSSEL

Grass pollen allergens. IV. The isolation of some of the principal allergens of *Phleum pratense* and *Dactylis glomerata* and their sensitivity spectra in patients. ROSA AUGUSTIN AND BARBARA J. HAYWARD
