This information is current as of May 2, 2022.

Why The JI? Submit online.

- **Rapid Reviews! 30 days*** from submission to initial decision
- **No Triage!** Every submission reviewed by practicing scientists
- **Fast Publication!** 4 weeks from acceptance to publication

*average

**Subscription** Information about subscribing to The Journal of Immunology is online at:
http://jimmunol.org/subscription

**Permissions** Submit copyright permission requests at:
http://www.aai.org/About/Publications/JI/copyright.html

**Email Alerts** Receive free email-alerts when new articles cite this article. Sign up at:

The Journal of Immunology is published twice each month by
The American Association of Immunologists, Inc.,
1451 Rockville Pike, Suite 650, Rockville, MD 20852
All rights reserved.
Print ISSN: 0022-1767 Online ISSN: 1550-6606.
THE JOURNAL OF IMMUNOLOGY

Official Journal of The American Association of Immunologists

Brain Neutralization of Rabies Virus to Distinguish Recovered Animals from Previously Vaccinated Animals. J. F. Bell, D. L. Lodmell, G. J. Moore and G. H. Raymond

Detection and Enumeration of Antibody-Producing Cells by Specific Adherence of Antigen-Coated Bentonite Particles. Phillip J. Baker, Michael Bernstein, Vilho Pasanen and Maurice Landy

Fractionation of Purified Antibodies to the Dinitrophenyl Group with Cross-Reacting Immunoadsorbents. W. C. Cheng and D. W. Talmage

The Use of a Water-Soluble Carbodiimide as a Coupling Reagent in the Passive Hemagglutination Test. H. M. Johnson, K. Brenner and H. E. Hall

An Immunochemical Analysis of Bacterial Mucopolymers. Walter W. Karakawa, Henry Lackland and Richard M. Krause

Effect of Appendectomy and of Thymectomy, with X-Irradiation, on the Production of Antibodies to Two Protein Antigens in Young Rabbits. Susumu Konda and T. N. Harris

Rubella Complement-Fixing Antigens Derived from the Fluid and Cellular Phases of Infected BHK-21 Cells: Extraction of Cell-Associated Antigen with Alkaline Buffers. Nathalie J. Schmidt and Edwin H. Lennette

“Protein A” from S. aureus. I. Pseudo-Immune Reaction with Human γ-Globulin. Anne Forsgren and John Sjoquist

Immunocompetence of Transferred Thymus-Marrow Cell Combinations. Henry N. Claman, Edward A. Chaperon and R. Faser Tripllett

Antigenic Analysis of Tumors and Sera from Animals Inoculated with PARA-Adenovirus Populations. Fred Rapp, Janet S. Butel, Satvir S. Tevetha, Myron Katz and Joseph L. Melnick

Physicochemical Properties of Reaginic Antibody. V. Correlation of Reaginic Activity with γE-Globulin Antibody. Kinshige Ishizaka, Teruko Ishizaka and Margaret M. Hornbrook

The Interaction of Antigen with Leucocytes of Allergic Individuals. Jacob J. Pruzansky and Roy Patterson

Immunocompetence Studies on Dextrans. V. Specificity and Cross-Reactivity with Dextrans of the Antibodies Formed in Rabbits to Isomaltonic and Isomalto-trionic Acids Coupled to Bovine Serum Albumin. Yutaka ARAKATSU, Gilbert Ashwell and Elvin A. Kabat

A New Serum Factor in Normal Rabbits. II. Reaction with Buried Antigenic Determinants Revealed after Papain Digestion. William J. Mandy

Prier:
BASIC MEDICAL VIROLOGY

Designed specifically as a textbook for students of basic science (particularly those whose ultimate occupation will be the practice of medicine or medical research), Basic Medical Virology contains only those facets of the subject which are applicable to its audience. This, it is hoped, will aid in the encouragement of the novice who is overcome by despair at the complexity and voluminous verbiage of virology books up to now. For these reasons, all clinical aspects have intentionally been omitted. An attempt has been made, rather, to bring together in a single book the essential information that is required for a basic understanding of the viral parasites and the mechanisms by which they exert their biologic influences on animal hosts. Twenty-three outstanding virologists, under the editorship of Dr. James E. Prier, have contributed to the book.

Edited by James E. Prier, Ph.D., Assistant Director, Division of Laboratories, Pennsylvania Department of Health; and Research Associate Professor, Department of Microbiology, School of Medicine, Temple University, Philadelphia, Pennsylvania.

1966 724 pp. 106 figs. $14.50
